Professional Series

Key Features:

- ▶ 60° x 40° Coverage
- ▶ 262H-1 Differential Drive® Low-Frequency Driver
- ▶ 2408H-1 High-Frequency Compression Driver
- ► Large PTTM Progressive Transition waveguide for excellent pattern control and low distortion
- ► Rotatable waveguide for vertical or horizontal orientation
- ▶ Bi-Amp/Passive Switchable
- Available in Black, White and WRC/WRX weather resistant finishes

Applications:

- ▶ Performing Arts Facilities
- ► Theatrical Sound Design
- Auditoriums
- ► Worship Facilities
- ▶ Live Clubs
- ▶ Dance Clubs
- ► Sports Facilities
- ► Themed Entertainment Venues

The AM5212/64 is a medium power, lightweight, 2-way, full-range loudspeaker system comprised of the JBL Differential Drive dual voice coil and dual magnetic gap 262H-1 300 mm (12 in) low frequency driver and 2408H-1 high-frequency 38 mm (1.5 in) exit, 38 mm (1.5 in) voice-coil compression driver. The large format Progressive Transition waveguide provides excellent 60° x 40° coverage. The waveguide is rotatable so the loudspeaker system can be used in either the vertical or horizontal orientation. High-slope passive networks minimize band overlap. Well-controlled off-axis response enhances arrayability.

The enclosure is constructed of multiply birch coated in JBL's rugged DuraFlex™ finish and is heavily braced to maximize low-frequency performance. The trapezoid enclosure is fitted with fifteen M10 threaded attachment points and utilizes a 14-gauge steel grille internally lined with acoustically transparent foam to provide additional driver protection and give a very professional appearance.

The AM5212/64 is part of JBL's AE Series, a versatile family of loudspeakers intended for a wide variety of applications.

Specifications:

Hz – 20 kHz Hz – 18 kHz ½ x 40°, rotatable waveguide 8 3 dB amp/Passive switchable kHz 400 W (1600 W peak), 2 hrs 300 W (1200 W peak), 100 hrs : 40 W (160 W peak), 2 hrs sive mode: 300 W (1200 W peak), 100 hrs amp mode: LF: 122 dB-SPL cont avg (128 dB peak) HF: 131 dB-SPL cont avg (137 dB peak) sive mode: 21 dB-SPL cont avg (127 dB peak) sive mode: 96 dB SPL : JBL 262H-1 300 mm (12 in) driver with 50.8 mm (2 in) dual ce coil shims dB SPL . 2408H-1, 38 mm (1.5 in) exit compression driver, 38 mm (1.5 in) ce coil

¹Bi-amp mode, with recommended active tuning, 2π half-space.

AES standard, one decade pink noise with 6 dB crest factor within device's operational band, free air. Standard AES 2 hr rating plus long-term 100 hr rating are specified for low-frequency transducers.

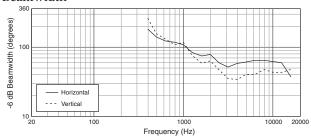

**IEC standard, bandwidth pink noise with 6 dB crest factor, 100 hours.

*Calculated based on power rating and sensitivity, exclusive of power compression. *Anechoic sensitivity in free field, no additional sensitivity gain from boundary loading.

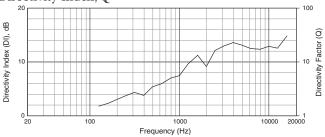

JBL continually engages in research related to product improvement. Changes introduced into existing products without notice are an expression of that philosophy.
