

FORGE II CASES

Priceless Protection for What Matters Most

Square corners and lightweight exterior latches and handles ensure unsurpassed Anvil quality.

Forge II cases are specifically designed for selected computer, audio/video, musical and trade show applications. Constructed as tough, non-A.T.A. carrying cases, Forge II provides superior protection for lighter items or short distance travel.

Exterior panels are built with strong, solid components, and interiors are custom-designed with precision-sculpted unicellular foam to provide maximum shock absorption and safety from damage due to vibration. The result is uncompromizing fit and maximum protection in a lighter-duty case.

Industry Applications

- ▲ Music
- ▲ Trade Show
- ▲ Military

- ▲ Computer/High Tech
- ▲ Audio/Video

- ▲ Broadcast
- ▲ Medical

FORGE II TECHNICAL INFORMATION

The Anvil Forge II case is unsurpassed as a light-duty, custom carrying case. Using carefully selected materials combined with precision manufacturing techniques, each Anvil Forge II case is constructed to provide maximum protection.

Exterior panels utilize luan supported by an outer frame of strong, lightweight aluminum edging and secured by machine-driven split steel rivets. Black ABS plastic provides a damage-resistant exterior surface. Soft, resilient unicellular foam is sculptured around each piece of equipment to create a secure and complete fit.

Construction Features

- ▲ 1/8" or 1/4" luan
- ▲ Aluminum edging
- ▲ Split steel rivets
- ▲ Full-length steel piano hinge (when specified)
- ▲ Tongue-in-groove valance
- ▲ Black ABS laminate
- ▲ Small square corners
- ▲ Telescopic construction with straps
- ▲ Exterior latches
- ▲ Exterior handles

Options

- ▲ Hard-mount rack system
- ▲ Light-duty or removable casters
- ▲ Card holders
- ▲ Rubber feet
- ▲ Designer ABS colors
- ▲ Stencil/Silk screen
- ▲ Tool pallet
