User's manual for all Deck 82 key backlit USB keyboards

System Requirements:

This device is designed for use with any computer with a USB port running Windows Vista, Windows XP, Windows 2000, Windows Millennium Edition, or Windows 98, and Mac OS9/OSX. It has also been tested on several (but not all) Linux distributions and found to work properly. The keyboard uses the host computer's operating system software drivers and therefore does not require custom software drivers to be installed on the host computer prior to use.

Installation:

Although USB devices are "plug and play", you may need to enable your system's USB. If so, please consult your system's documentation. Connect the keyboard's data cord to a USB port. The system may "find new hardware" the first time the device is connected. If so, it will prompt you to find the best software driver for the device. This software driver should be found on your operating system disk. Please follow your system's prompts. The device is now ready for use.

Operation:

The keyboard functions similar to any other keyboard; the most noticeable difference is backlighting. The keyboard has 8 levels of brightness: "0" through "7" with "0" being off and "7" being full brightness. Note that LEDs may not be illuminated evenly from key to key at the low brightness levels – especially on the green backlit keyboards. There are two ways to change the brightness level. The first step in either method is to press and hold the "Fn" key down; it's located just to the right of the spacebar.

The first method incorporates the "up" or "down cursor" keys to brighten or dim the brightness respectively. With the "Fn" key held down, if you press one of these cursor keys, the brightness will step one level in the corresponding direction. If you continue to hold the cursor key down, the level will continue to step in that direction at a rate of about 3 steps per second. However, there is no "roll-over". For example, once you reach maximum brightness, the level will not "rollover" to off, and then continue getting brighter. This first method of changing the brightness is relative – you don't know your current brightness level - you just want to either brighten or dim the brightness.

The second method is absolute – you know the brightness level that you want and you want to get there directly. This method incorporates the numerical keys located just below the function keys. Again, start by holding down the "Fn" key, then press either "0" for off, or "1" – "7" for on brightness levels.

No information will be sent to the PC while the "Fn" key is held down and either the "up" or "down cursor" keys, "0" or "1" – "7" keys are pressed. In other words, the keyboard doesn't tell the PC these keys are being pressed. It also doesn't matter which key you release first. However, any other key press will be reported to the PC regardless of the state of the "Fn" key.

Electrical, Mechanical, Environmental, Regulatory:

This device operates from +5Vdc +/- 10% and draws 248mA maximum.

Overall dimensions: 12" x 6" x 1.5"

Weight: 2 pounds

Storage temperature: -55°C (-67°F) to +85°C (185°F)

Operating temperature: -40°C (-40°F) to +70°C (158°F)

This device complies with FCC part 15, subpart B, class B.

This device is a UL recognized component for Information Technology Equipment.

Care and Maintenance:

No maintenance should be required. The keyboard may be occasionally cleaned using a damp, lint-free cloth.

Tested To Comply With FCC Standards FOR HOME OR OFFICE USE.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experience radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This product as originally supplied is a U.L. recognized Information Technology Equipment component in the United States and Canada.

Health Warning:

Continuous use of a keyboard may cause Repetitive Stress Injuries or related injuries. If you feel any aching, numbing or tingling in your arms, wrists or hands, consult a qualified health professional.

TO REDUCE YOUR RISK OF REPETITIVE STRESS INJURY:

- Take frequent breaks from typing
- Maintain a straight wrist position
- Avoid resting on your wrist while typing
- Use a light touch on keys
- Maintain good health habits

Return policy

There is a 30-day trial period. You can return the keyboard anytime within the 30 days for a refund, (less shipping and handling), provided that it **has not** been modified. It must be returned in the condition that you received it. For more information please visit <http://www.deckkeyboards.com/returns.php>.

Warranty

The warranty period is for one year from the date of purchase. Non-destructive modifications are okay, subject to our discretion. Warranty is valid for original purchaser only and cannot be transferred. For more information please visit <http://www.deckkeyboards.com/warranty.php>.

Technical support

Technical support is free and the easiest way is through email at support@deckkeyboards.com. Community and staff support is also available via our forums which are located at <http://www.deckkeyboards.com/forum>.
