

A woman in a black dress and wide-brimmed hat stands on a beach, holding the handle of a white Emmaljunga baby stroller. The background shows the ocean and a blurred figure in the distance.

Emmaljunga®

UK
2010

Emmalunga, since 1925 Manufactured in Sweden.

Emmalunga has been manufacturing prams in its own factory, based in Emmalunga, Sweden, since 1925.

We have made a conscious choice, as the only pram manufacturer to retain production in Sweden and Europe, to invest heavily in product development and environmental safeguards in our Swedish factory. This means that we are unable to mass produce prams in the lowest price range.

At a time when the choice of products is vast and products become more and more interchangeable, strong brands represent more than exceptional quality. Our customers and suppliers appreciate our responsibility and commitment, which we value above, growth and market share.

Our core values of safety, function and design have made Emmalunga a well respected name around the world. With approximately 95% of all prams now being manufactured in Asia, we are proud to be different and maintain our tradition of craftsmanship in Sweden. Thus, we have maintained our quality control, skills and workplaces in Europe and offer our customers the opportunity to consider not only quality, but also the environment in their purchase.

Please visit www.emmalunga.co.uk where you will find more information about the company, product images and our company movie. The website also features a list of our authorised retailers.

Welcome to Emmalunga!

Manufactured in Sweden
for the benefit of the
next generation.

We want to actively participate in creating a good environment for the next generation. Our investments in reducing Emmaljunga's impact on the environment have led to a reduction of our factory's CO₂ discharge by over 400 tons a year. Other active investments within the energy saving arena have resulted in savings of over 750,000kWh of power a year in our production process. We like to say that we take the lead not only in the technical development of prams, but also in creating what is today, one of the world's most energy efficient pram factories. In addition, by maintaining production in Europe, the impact of our transportation activities on the environment is much lesser than many of our competitors, whose manufactured products are imported from Asia.

We hope you will support our active choice to protect the environment.

MONDIAL DUO COMBI

From birth to 3 years

Exclusive and practical

Mondial Duo Combi is designed for our fashion conscious customers who want a chic, exclusive, classic and elegant world class 3-in-1. Mondial is based on one of our best-selling prams, which has already received international recognition. As a result, every detail has been tested and refined. With the Mondial, you can enjoy a shopping trip and stay out all day, with a clear conscience, knowing that your child has a comfortable and peaceful environment in the spacious carrycot. The pram can be used as a travel system if you buy an adaptor and Emmaljunga's First Class^{0+Base} car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit.

Mondial Duo Combi is fully equipped for use from birth to 3 years of age including a carrycot and a reversible seat unit. Choose from 5 colours and 3 different chassis options.

Colours and detailed information: page 56.

Travel system: page 40–45.

CITY CARRYCOT

From birth to 6 months. Compatible with: City Cross, Nitro^{City}, Ozone^{City} and Cangaroo^{City}

Transform your stroller into a light and flexible pram

The City Cross, Nitro^{City}, Ozone^{City} and Cangaroo^{City} strollers can be converted into light and compact prams with the addition of the City Carrycot for the newborn baby. The lightweight City Carrycot (4.2 kg) has generous inner dimensions (75 cm long) and can be easily attached on to the chassis in place of the seat unit. After 6 months, the City Carrycot can be removed and the seat unit can be used on the chassis. The City Carrycot is available in 21 colours.

CITY CROSS

From 6 months to 3 years. From birth with City Carrycot, Babylift or Quadrolift

The successful pram you can trust

The City Cross has been a great success since its launch together with the City Carrycot. Many parents appreciate its compact size and lightweight chassis. With the addition of new super light, sporty wheels, the pram now only weighs 12.9 kg with the City Carrycot (see picture below). It has a lightweight painted aluminium chassis combining low weight with comfort, strength and safety. The seat unit is reversible and the stroller can be used from birth with the addition of the City Carrycot (see page 12-13). It can be used as a travel system if you buy an adaptor and Emmaljunga's First Class^{0+Base} car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit. City Cross is available in 21 colours.

21001City Cross Navy

City Cross with City Carrycot (accessory)

NITRO^{CITY}

From 6 months to 3 years. From birth with City Carrycot, Babylift or Quadrolift

Swedish dynamite for the inner city

Nitro^{City} is a slimline yet tough stroller which has become very popular among parents. Simple, lightweight (only 10.9 kg with the City Carrycot) and practical for urban travel on buses and the underground. The stroller is extra narrow (57cm) and very flexible with swivel front wheels, which allow you to turn the stroller on the spot and move easily through busy city streets and shopping centres. Despite the pram's minimal outer measurements, the seat unit is very generous (90cm long x 32cm wide). These are the same dimensions as most other Emmaljunga prams, allowing your child to use the seat unit in comfort up to approximately 3 years of age. The seat unit is reversible and the stroller can be used from birth with the addition of the City Carrycot (page 12-13). Nitro^{City} can be used as a travel system if you buy an adaptor and Emmaljunga's First Class^{0+Base} car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit. Nitro^{City} is available in 21 colours.

25008 Nitro^{City} Dark Beige

Nitro^{City} with City Carrycot (accessory)

OZONE^{CITY}

From 6 months to 3 years. From birth with City Carrycot

Super lightweight!

Ozone builds upon our successful lightweight Nitro chassis with the addition of a new superlight seat unit. Ozone is a simple, extremely lightweight stroller (10.9kg with the City Carrycot and 10.6 kg with the seat unit). It is extremely narrow (only 57cm) and very flexible with swivel front wheels, which allow you to turn the stroller on the spot and move easily through busy streets and narrow doors. The new lightweight, ergonomically designed seat unit provides maximum comfort for even the smallest child. The seat unit is 90cm long and is reversible. It has a multi-position recline function with 4 seat/lying positions.

The stroller can be used from birth with the addition of the City Carrycot (page 12-13). Ozone can be used as a travel system if you buy an adaptor and Emmaljunga's First Class⁰⁺ Base car seat. Ozone^{City} is available in 14 colours.

38010 Ozone^{City} Royal Blue
Delivery Spring 2010

Ozone^{city} with City Carrycot (accessory)

CANGAROO^{CITY}

From 6 months to 3 years. From birth with City Carrycot

Strong and manoeuvrable

Cangaroo^{CITY} is a tough 3-wheeler with a swivel front wheel, which makes it easy to manoeuvre and a pleasure to push over all sorts of terrain. The Cangaroo^{CITY} has a simple, modern design and can be used from birth with the addition of the City Carrycot (page 12-13).

The pushchair features easy, compact folding, puncture free wheels and a spacious tray. Cangaroo^{CITY} can be used as a travel system if you buy an adaptor and Emmaljunga's First Class^{0+Base} car seat. Cangaroo^{CITY} is available in 5 colours.

31002 Cangaroo^{CITY} Black

Cangaroo^{CITY} with City Carrycot (accessory)

An Emmaljunga pram
grows with its task.

An Emmaljunga pram is distinguished by a timeless design which can be adapted to meet the needs of your lifestyle. Our design philosophy is simple and is reflected in the harmonious dimensions of our products.

An Emmaljunga pram is recognised as being of high quality and the needs of the child form the foundation to all of our design processes.

At Emmaljunga we put a lot of thought into ensuring our prams are practical for use in everyday life. Our aim is to enable you to use your Emmaljunga pram for more than one child.

If you look after your Emmaljunga pram well and follow the care and maintenance instructions, this will definitely be possible.

If you are expecting another baby and there will only be a small age difference between your children, you can buy our Toddler Seat which can be easily attached to most of our seat units. With the Toddler Seat you can turn your Emmaljunga pram into a sibling pram without having to start again and buy new products.

If the age difference between your children is a little greater, we offer a Toddler Roller, which can be attached to the pram, giving the older child something to stand on when they need a rest from walking.

An Emmaljunga pram grows with it's task and gives you long-term value for your money.

TODDLER SEAT

From 1 year to approx. 3 years (maximum weight 15 kg)

Transport an older sibling

With the Emmaljunga Toddler Seat you can take your older child along on short walks. The Toddler Seat is assembled onto the seat-unit. The advantage with the Toddler Seat is that you get a narrow and practical stroller which folds compactly despite the fact that it can carry two children. Although it provides more limited space and comfort than one of our twin/sibling strollers. Please ensure that you follow our safety instructions for the Toddler Seat thoroughly to avoid the stroller becoming unbalanced.

The Toddler Seat can be assembled on the following pushchairs: Edge 3-in-1, Mondial 3-in-1, Smart 3-in-1, Classic Sport Stroller, Nitro^{City}, and City Cross

Add a Quadrolift for the small baby. The Toddler Seat is available in 3 different colours (Navy, Black, Sand).

Colours and detailed information: page 56.

WARNING!

Never let go of the stroller handle when a child is placed in the Toddler Seat. Always take the child out of the Toddler Seat first, before removing the second child from the stroller. If you are walking for long periods we recommend that you buy a twin pushchair since it will give both children the chance to rest comfortably and sleep during journeys.

75002 Toddler Seat Black

City Cross with Toddler Seat

TODDLER ROLLER

Suitable from approx. 2 years to 5 years (maximum weight 20 kg)

Let the siblings ride along

If you want to take a walk with two children you can buy an Emmaljunga Toddler Roller, which can be attached easily on to most of our chassis. The Toddler Roller can easily be clicked on and off and if you do not need it during your journey, you can attach it by a strap to the handlebar.

Emmaljunga offers the following Toddler Rollers:
Art nr. 71000: suitable for Edge (Sport Chassis), Nitro, Ozone^{City}, City Cross, Cerox^{2.0}, Twin City Cross, Twin Nitro

Art nr. 71001: (Delivery Dec 2009) suitable for Scooter 2.0, Kangaroo

Art nr. 70000 + 70001 Adaptor: suitable for Classic chassis and Smart chassis

Toddler Roller for oval tube chassis
(Article nr. 71000)

CLASSIC SPORT

From 6 months to 3 years. From birth with Babylift or Quadrolift

The classic pushchair

Emmalunga's Classic Sport has been a worldwide bestseller for over a decade and is suitable for use from 6 months to 3 years. The stroller can be used from birth with the addition of a Babylift or Quadrolift. The Classic Sport can also be used as a travel system if you buy an adaptor and Emmalunga's First Class^{0+Base} car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit. Classic Sport is available in 5 colours.

23008 Classic Sport Dark Beige

Classic Sport with Quadrolift
(accessory)

CEROX^{2.0}

From 6 months to 3 years. From birth with Babylift or Quadrolift

Fantastic 'all-round' stroller

Cerrox^{2.0} Sport Stroller is a fantastic "all-rounder", with a generous seat unit (90cm long). Already a true Emmaljunga Classic, the original Cerrox has been upgraded this year with the addition of a newly designed hood and tough new lightweight wheels.

Light and compact with a sturdy lightweight steel chassis, the Cerrox^{2.0} also features a reversible handle, which allows you to change the direction your child is facing quickly and easily. The handle can be reversed while the child is sitting in the stroller - a practical feature for instance if the sun or wind is bothering your child whilst facing forwards. The stroller can be used from birth with the addition of the Babylift or Quadrolift accessory. Cerrox^{2.0} is available in 15 colours.

Colours and detailed information: page 62

Accessories: page 51-55

Technical information: page 72-75

20011 Cerrox^{2.0} Lime

Cerrox^{2.0} with Quadrolift (accessory)

SCOOTER^{2.0}

From 6 months to 4 years

Unbeatable all terrain stroller

Scooter^{2.0} is a simple and practical stroller (not suitable from birth). It is one of Emmaljunga's strongest, lightest, and most versatile models. It combines quality with a very reasonable price and is therefore a strong favourite in our range. Scooter^{2.0} is an upgrade of our original Scooter model with a tougher appearance, new design and the addition of strong lightweight wheels. Although, the sturdy lightweight steel chassis remains the same, the stroller has undergone a total design lift. Scooter^{2.0} tackles a variety of terrains with ease. Enjoying a stroll on the beach, a ramble through the forest or trudging through the snow is not off limits. Scooter^{2.0} is perfect for those who require a stroller that is easy to push, can be used anywhere, is simple to use and compact to fold.

It can be used from the time when your child is able to sit up unaided. To make the 5-point harness a more suitable fit for a 6 month old baby, you can buy the Minimizer/Seat Pad (accessory). Scooter^{2.0} is available in 15 strong colours.

Colours and detailed information: page 63

Accessories: page 51-55

Technical information: page 72-75

37014 Scooter^{2.0} Sunset

Scooter^{2.0} folded

SPIDER

From 1 to 4 years

Gets around everywhere

Spider is our smallest ever Sulky stroller, tested and appreciated by thousands of Scandinavians over the years. This year our little Sulky has been given a thorough design lift, yet retains the simple construction, appreciated by parents who require their stroller to be as small as possible. Simplicity and durability in the design enables you to get around everywhere and ensures the use of your Spider for many years to come. Spider is slender and flexible – the strength lies in the thin steel tubing of the chassis. With its simple seat design featuring a recline position, it is perfect to keep in the car and take on holiday. Fold the chassis with a simple one foot action to give you a light, compact stroller (8.1 kg). Comes without a hood, but is great for short journeys with your little 'Spidermen' and ladies, already kitted out with their rubber boots and rain clothes, ready to go when they arrive at the nursery, the beach or forest. The fabrics are removable and washable and the head cushion is reversible. A simple sun canopy is available as an accessory. Spider is available in 11 colours.

Colours and detailed information: page 65

Accessories: page 51–55

Technical information: page 72-75

Spider folded

39012 Spider Candy Pink

Spider with sun canopy (accessory)

TWIN NITRO

From 6 months to 3 years. From birth with Twin Duolift or Quadrolift

Easy to manoeuvre sibling/twin pram with lots of space for your children

Twin Nitro is the twin version of our successful Nitro stroller and the toughest twin/sibling pram in our range. Great importance has been placed on giving the children as much space as possible yet still keeping the width as narrow as possible. Despite its generous inner measurements, the stroller will still fit through standard doors. Each child has almost as much space as in a single pram and there is plenty of room for two Twin Duolifts or two Quadrolifts for newborn babies.

Twin Nitro is a must if you travel regularly with two children. The small swivel, puncture free front wheels provide maximum manoeuvrability and make the pram a pleasure to push even if it is heavily loaded. There are individual backrests and footrests for each child so that they can rest independently of one another. The seat unit is reversible so that the children can face you or face forward. With its lightweight steel chassis, weight is kept to a minimum (17.6kg). The compact dimensions of the folded stroller make it relatively easy to place in the car boot. Twin Nitro is available in 6 colours.

Colours and detailed information: page 64

Accessories: page 51-55

Technical information: page 72-75

28019 Twin Nitro Pro Forest

Twin Nitro with Quadrolift (accessory)

TWIN CITY CROSS

From 6 months to 3 years. From birth with Twin Duolift

Strong and practical sibling/twin pram

The Twin City Cross has been a sibling/twin parents' favourite for a number of years and has been designed and developed to provide comfort and space and tackle all sorts of terrain with ease. With the addition of the Twin Duolift, the Twin City Cross can be used from birth.

The coated aluminium chassis is lightweight and combines strength and safety. It also features puncture free lightweight wheels. Twin City Cross is available in 6 colours.

Accessories: page 51-55

Technical information: page 72–75.

27009 Twin City Cross Offroad

Twin City Cross with Twin Duolift (accessory)

FIRST CLASS^{0+BASE}

Car seat From birth to approximately 1 year (0–13 kg)

Ensure your baby travels safely from the start

Your baby's first journey in life is most probably from the maternity ward to your home. From this time forward there will be many more journeys for you and your baby to make and for these journeys, it is vital that your baby travels in a secure car seat. Emmaljunga has spent several years developing its First Class^{0+Base}, a tough and well designed car seat, which meets the high standards required with regard to safety, choice of materials, comfort, ergonomics, user friendliness and design, which makes the product an outstanding choice.

If you do not want to wake your child after a car journey you can simply remove the car seat from the car and click it on to most of our Emmaljunga chassis (travel system adaptor is required) and you're ready to go. If you have a busy lifestyle you can save even more time by buying our Base alongside your Emmaljunga car seat, which can be easily attached in the car (see page 44). After installing the Base you can simply click the car seat into it or remove it with one easy action when taking your child in and out of the car. First Class^{0+Base} is available in 12 colours.

Colours and detailed information: page 66.

Accessories: page 51-55

88004 First Class⁰⁺ Base Creme Leatherette

First Class^{0+Base} as a Travel System
on City Cross chassis

FIRST CLASS^{0+BASE}

Car seat From birth to approximately 1 year (0–13 kg)

Emmaljunga's own car seat

Emmaljunga has been manufacturing prams with safety and comfort in mind for over 80 years. It has always been our aim to ensure that our products are both safe and simple to use. Our dedication to producing a complete, functional solution to transporting babies in both cars and prams is the reason that we have now developed our own First Class^{0+Base} car seat.

Simple and easy to use

The development team in Emmaljunga Automotive Safety Division has focussed heavily on the child's safety. Other important factors in the development of the car seat include user friendliness, good quality material choice, comfort and last but not least, creating a strong modern look.

Manufactured in Sweden

The car seat is manufactured in Sweden which means we have full control over the whole manufacturing process. The result is a lightweight, stylish modern car seat which applies to the norm of ECE R44/04.

Optimal lying curve

By adjusting the head protection on the car seat to suit the child's size, the 5-point harness and the child's lying curve are also automatically adjusted. Therefore, when the child is small a relatively flat lying curve (bottom position is high up in the seat) can be achieved. As the child grows bigger, the head protection can be moved further up the seat, which automatically lowers the seat under the bottom, thereby decreasing the centre of gravity and increasing safety.

Travel system for the pram

Babies often fall asleep during car journeys. With our travel system the child can be left sleeping undisturbed in the car seat when it is taken in and out of the car, so that baby can wake naturally, happy and rested! Lift the car seat with the sleeping baby out of the car and click it into place with a Travel System Adaptor on an Emmaljunga chassis.

First Class^{0+Base} can be attached with the car's three-point safety belt

FACTS

First Class^{0+Base}, Base, Travel System

Norm ECE R 44/04

Group 0+, up to 13 kg

Assembly without Base

Place rearwards in the front* or back seat and attach with the car's 3-point safety belt.

Assembly with the Base (ISOFIX)

Place rearwards in the front* or back seat. The Base is attached with the car's ISOFIX attachment points and the support leg is unfolded and supported against the floor of the car. The car seat is clicked on to the Base.

Assembly with the Base

(the Base is attached with the car's safety belt)

Place rearwards in the front* or back seat. The base is secured with the car's safety belt and the support leg is unfolded and supported against the floor of the car. The car seat is clicked on to the Base.

Attaching on to the pram (Travel System)

The car seat can be clicked into place with the aid of an adaptor on to all of our 3-in 1 prams, City Cross, Nitro^{City}, Ozone^{City}, Cangaroo^{City} and the Classic Sport Stroller (see summary table on page 74-75).

Functions

- Adjustable head protection (6 positions)
- Automatic optimisation of the lying curve
- Automatic adjustment (lengthways) of the 5-point harness
- Central and easily accessible belt adjustment
- Side impact head protection
- Multi position handle with one hand regulation
- Storage compartment in the back of the seat
- Shoulder pads
- Washable and removable fabrics (no need to interfere with the car seat's 5-point harness)
- Attachment points for assembly on the adaptor/pram and Base
- Easily accessible instruction manual

Including Mini hood

Manufacturing country Sweden

Weight without hood 4.2kg*

Weight hood 0.3kg

Stockists Selected authorised Emmaljunga retailers

* 88004 Creme Leatherette are slightly heavier as they are made out of more expensive and heavier fabrics.

* **WARNING!** Never assemble a rearward facing car seat in the front seat if there is an airbag. Death and serious injury can occur.

BASE FOR FIRST CLASS^{0+BASE}

From birth to approximately 1 year (13 kg)

A safe way to save time

Do you have a busy lifestyle and make lots of short journeys where the child needs to be taken in and out of the car several times a day?

If so, the Base makes it even simpler to take your First Class^{0+Base} in and out of the car. The Base is a safe platform which can be attached in the car, either with the car's ISOFIX attachment points or if it lacks ISOFIX points, with the car's 3-point safety belt. Then it is only a click to secure or remove the First Class^{0+Base} in the car.

The Base is a modern, secure and very practical product. It is easy to transfer between cars - just detach it from the ISOFIX attachment points or the car's safety belt and fold back the support leg.

84000 Base First Class^{0+base}

It is easy to attach the First Class^{0+Base} to the Base

Light diodes signal that the Base is attached correctly to the ISOFIX points and that the car seat is attached correctly to the Base.

CHANGING BAG

Choose between Exclusive and Sport style

Exclusive Changing Bag

The popular Exclusive Changing Bag is in essence a modern and spacious handbag including a changing mat. It also features plenty of practical and easily accessible storage compartments for nappies, bottles, mobile phones, and much more. Even when your children are older, you can still enjoy using it as a stylish handbag. The Exclusive Changing Bag is available in 4 colours.

Sport Changing Bag

This new changing bag has a sporty look and is designed to provide maximum space for towels and other items when you are on an outing for instance to the beach or pool. It includes a changing mat and features plenty of practical storage compartments for nappies and much more. An exceptionally lightweight bag with a modern, sporty design which both mother and father will be happy to carry, the Sport Changing Bag is available in 21 colours.

49011 Sport Changing Bag Lime

QUADROLIFT

From birth to 3 years

Soft and luxurious from birth up to 3 years

The Quadrolift is a clever and innovative product incorporating four practical functions in one item. It can be used as a cocoon, a lift, a footmuff and a seat pad with a winter and summer lining.

The Quadrolift is the result of a lengthy product development process, conducted in close cooperation with parent groups. The finished item is a beautifully crafted, exclusive product which can be used from birth up to the age of 3 years. Besides being a very practical product to use, the Quadrolift is also incredibly soft and luxurious, creating a comfortable environment for your child. We have chosen only the softest and the highest quality materials to produce the Quadrolift. To understand just how soft it is, you will have to feel it! The Quadrolift is available in 21 colours and is compatible with most Emmaljunga prams.

Colours and Detailed information: page 50.

Accessories: page 51–55.

Technical information: page 72–75.

63004 Quadrolift Creme Leatherette

Quadrolift as a Cocoon in a Mondial

QUADROLIFT

From birth to 3 years

Four smart and practical functions

1. Cocoon

Perfect for use in Emmaljunga's 3-in-1s and City Carrycot. Place the Quadrolift straight into the carrycot part or into the City Carrycot. There are many advantages. For instance, in situations where it is impractical to take your pram along - such as the doctor's surgery, a restaurant or into a flat - you can remove your baby from the carrycot in the cocoon where the child can continue to lie in comfort. You can also reverse the mattress and choose between the cosy faux Husky fur for the winter or soft cotton fleece for the summer.

2. Lift

If you buy an Emmaljunga pushchair without a carrycot for a newborn, you can convert the pushchair into a luxurious pram with the Quadrolift. If you remove the bumper bar and place the Quadrolift in the stroller, it can easily be used from birth. It is compatible with most of our strollers including the Twin Nitro (not Twin City Cross).

3. Winter/summer footmuff

When your child can sit unaided and you have converted your 3-in-1 pram into a pushchair, the Quadrolift can be used as a footmuff to ensure your child's legs are kept warm. The footmuff can be easily attached to the seat unit with clips. You can reverse the liner in the footmuff and choose between cosy faux Husky fur for the winter or soft fleece for the summer.

4. Winter/summer seat pad

The Quadrolift can also be used as a comfortable seat pad by removing the mattress from the Quadrolift and attaching it easily in to the stroller. The pad is reversible so you can choose which side should be facing upwards - cosy faux Husky fur for the winter or soft cotton fleece for the summer.

Quadrolift in the Mondial

accessories to match your pram

Quadrolift

The Quadrolift has four practical functions and can be used from birth up to 3 years. It can be used as a Cocoon, a Lift, a Winter/Summer footmuff and a Winter/Summer seat pad. It fits in both the pram and stroller and the Twin Nitro. For detailed information see page 48. Outer measurements: 83 x 38 x 21cm. Inner measurements: 79 x 32 x 18cm. Weight including seat pad: 3.1 kg. Weight without seat pad: 2.7 kg. Available in 21 colours.

Babylift

Allows you to use your stroller for a newborn baby. It has a removable mini hood which protects your child against sun and wind, even when you have removed the lift from the pram. Includes mattress. Measurements: 75 x 30 x 19 cm. Weight 2.6 kg. Available in 12 colours.

Twin Duolift

For use with the Twin City Cross we recommend the extra narrow Duolift which can be placed in the stroller. The Duolift has a stable wooden base and strong carrying handles. When the child gets older you can convert the Duolift into a footmuff. Outer measurement: 80 x 30 cm; inner measurement: 75 x 25cm. Weight: 2.6 kg. Available in 6 colours.

ACCESSORIES

Practical and colour coordinated

Allround Footmuff

A comfortable and practical footmuff with lovely soft cotton fleece, in a new design. The footmuff has openings for the 5-point harness with two separate positions for the shoulder straps. Made using Thermofil, this item can be used all year around. In warm weather, the top panel can be removed to allow the footmuff to be used as a seat pad. There are also clips which allow you to attach the footmuff into the pram so that it will stay securely in place. Available in 18 colours

Winter Footmuff

Perfect for cold walks, the Winter Footmuff is lined with warm fleece and includes openings for the 5-point harness, with two separate positions for the shoulder straps. There are also clips which allow you to attach the footmuff into the pram so that it will stay securely in place. Double zippers make it easy for you to take your child in and out of the footmuff. Available in 14 colours (uni-colours).

Allround Footmuff

Leatherette

For our leatherette prams, there is now a matching exclusive footmuff in a new design. As our leatherette fabrics cannot be washed (only wiped clean with a damp cloth), the soft inner-lining of the leatherette footmuff is removable so that it can be washed separately. It also features openings for the 5-point harness with two separate positions for the shoulder straps. There are also clips which allow you to attach the footmuff into the pram so that it will stay securely in place. Available in 3 leatherette colours.

Minimizer/Seat Pad

To ensure that the 5-point harness is in a suitable position for a smaller child, you can buy a Minimizer/Seat Pad for your pram. It features two separate openings for the 5-point harness' shoulder straps so that you can position the straps lower down to ensure that the smaller child can rest comfortably. The seat pad is reversible with a hard wearing material on one side and soft cotton fleece on the other. There are also clips which allow you to attach the Minimizer into the pram so that it will stay securely in place. Why not buy a colourful seat pad for a uni-coloured stroller for a new look. Available in 14 colours.

ACCESSORIES

Practical and colour coordinated

Exclusive Apron

This stylish tailored apron protects your child in the stroller in all weathers and provides extra protection in cold weather if used over the footmuff. Available in matching colours for: Nitro^{City}, City Cross, Ozone^{City}, Kangaroo^{City}, Cerrox, Scooter, Twin City Cross and Twin Nitro. Available in 21 colours depending on pram model. An Exclusive Apron is also available for the First Class^{0+Base} car seat in 9 colours (uni-colours), to protect your child in bad weather when the car seat is used on the chassis as a Travel system.

Matching Bedset

A decorative and practical Bedset is available for Emmaljunga prams comprising a quilt cover (80 x 80cm) and a pillow slip (35 x 35 cm). It is available in 5 colours which match the inner lining of the pram. If you want to tuck your child in with something more luxurious the Bedset "Romantic", featuring lace detail is also available (see the picture below).

ACCESSORIES

Practical and colour coordinated

Sibling Toddler Roller

A practical transport solution for siblings up to 5 years of age. Easily attached on most Emmaljunga chassis.

Art nr. 71000: fits Edge (Sport chassis), Nitro, Ozone^{City}, City Cross, Cerrox^{2.0}, Twin City Cross, Twin Nitro

Art nr. 71001 (Available Dec 2009): fits Scooter^{2.0}, Cangaroo

Art nr. 70000 + 70001 adaptor: fits all Classic chassis, Smart chassis

Sibling Toddler Seat

With the Emmaljunga Toddler Seat you can take your older child along on short walks. The Toddler Seat can be assembled on to the seat unit on the following prams: Edge 3-in-1, Mondial 3-in-1, Smart 3-in-1, Classic Sport, Nitro^{City} and City Cross. Available in 3 colours: Navy, Black, and Sand

Warning! You must carefully follow our safety instructions for the Toddler Seat.

Travel System Adaptor

Allows you to attach the First Class^{0+Base} car seat on to the following prams: Edge 3-in-1, Mondial 3-in-1, Smart 3-in-1, City Cross, Ozone^{City}, Nitro^{City}, Cangaroo^{City}, Classic Sport. The adaptor has two recline positions - one is slightly more upright than the other which reclines a little to allow your child to sleep more comfortably.

ACCESSORIES

Practical and colour coordinated

Sport Changing Bag

More information on page 46. This new modern changing bag has a sporty look and is designed to provide maximum storage space with plenty of practical compartments for nappies, bottles and more. A washable changing mat is included. Available in 21 colours. Measurements 40 x 15 x 33cm

Exclusive Changing Bag

More information on page 46. The popular Exclusive Changing Bag is in essence a modern and spacious handbag with plenty of practical storage compartments for nappies, bottles, mobile phones and much more. Includes a separate changing mat. Available in 4 colours. Measurements: 42 x 13 x 33cm.

Parasol

UV50+ protection. Practical for sunny days, the parasol can be easily attached to the chassis and can click on and off with ease. Available in 18 colours.

Nylon Raincover

A nylon raincover in a practical bag is supplied with most of our prams. This can also be bought as an accessory.

Clear Plastic Raincover

A clear plastic raincover with air-vents is available for most models. Only available for the UK market.

Suitable from birth to approximately 3 years.
Fully equipped for use from birth to 3 years of age:

- carrycot with cradle function
- long seat unit (90 cm)
- dual purpose hood for the carrycot and seat unit
- reversible seat unit to change child's travel direction
- anti-static mattress
- head protection
- stretch comfort 5-point harness
- separate aprons for the carrycot and seat unit
- nylon raincover included
- sun/mosquito net in the hood
- reversible footrest cover
- option to use as a travel system with First Class^{OnBase} car seat (page 40-45)
- compatible with a Toddler seat (page 24-25) or a Toddler Roller (page 26)
- choice of three award winning chassis featuring Emmaljunga's ball bearing air wheels:
Classic Chrome (with whitewall wheels)
Classic Cryptonite
Sport Cryptonite

CHASSIS

The Classic chassis is extremely strong yet compact and narrow with a reversible seat unit and steel tray. It has a height adjustable handle and the patented adjustable E.A.S.T. suspension system, which can be adjusted according to the child's weight and the terrain
Chassis weight: 7.0kg, Wheels weight: 3.6kg
Seat unit weight: 6.1kg, Carrycot weight: 5.6kg
Outer measurements (folded incl. wheels): 91 x 59 x 51 cm (length x width x height)

The Sport Chassis is extremely sturdy and features a telescopic, multi-position height adjustable handle, which is also reversible, allowing you to change the direction the child is facing quickly and easily while your child is in the pram (for instance, to protect your baby from the elements). The Sport chassis also has a spacious fabric tray.
Chassis weight: 8.9kg, Wheels weight: 4.0kg
Seat unit weight: 6.1kg, Carrycot weight: 5.6kg
Outer measurements (folded incl. wheels): 96 x 67 x 52cm (length x width x height)

TODDLER SEAT

p 24-25

Suitable from birth to approximately 3 years (max 15 kg)

- With the Toddler seat you can take an older child along on short walks
- The seat unit has no recline position so for long walks we would recommend you to choose one of our twin/sibling prams (page 36-39)
- The pram can be folded with the Toddler seat assembled on the seat-unit.

The Toddler seat can be assembled on the seat-unit of the following prams: Edge 3-in-1, Mondial 3-in-1, Smart 3-in-1, Classic Sport, Nitro^{City} and City Cross.

CITY CARRYCOT

p 12-13

Suitable from birth to approximately 6 months. The City Carrycot allows your baby to travel in comfort. It can be bought separately and is available in coordinating colours for the strollers in Emmaljunga's versatile City collection:

- City Cross
- Nitro^{City}
- Ozone^{City}
- Kangaroo^{City} (requires adaptor)

It can be easily and securely attached on to the chassis in place of the seat unit. Once the child has grown bigger the seat unit can then be attached on to the chassis again.

Weight: 4.2kg*

Inner measurements: 75 x 33 x 19cm.

* Leatherette City Carrycots (24003, 24004, 24005) are slightly heavier as they are made from more expensive and heavier fabrics.

FIRST CLASS⁰⁺ BASE

p 40-43

Suitable from birth to approximately 1 year (0–13 kg):

- Emmaljunga's own in-house designed and developed car seat
- can be fitted in the car with the seat belt or the Emmaljunga Base
- when used with the Base in the car the First Class⁰⁺Base can be taken quickly and easily in and out of the car
- adjustable head protection (6 positions)
- automatic optimisation of the child's lying curve
- automatic adjustment (lengthways) of the 5-point harness
- central and easily accessible belt adjustment (belt length)
- side impact head protection
- multi-position handle with one hand regulation
- storage compartment in the back of the seat
- shoulder pads
- washable and removable fabrics (without having to interfere with the car seat's 5-point harness)
- attachment points for fitting on to the adaptor/pram and Base
- easily accessible instruction manual
- mini hood included

With the Travel System Adaptor (82001) the First Class⁰⁺Base can be attached to:

- Mondial 3-in-1
- Edge 3-in-1
- Smart 3-in-1
- City Cross
- Nitro^{City}
- Ozone^{City}
- Classic Sport
- Kangaroo^{City} (with the Kangaroo adaptor)

Weight without hood: 4.2 kg*

Hood: 0.3 kg

* First Class 0+Base (88004) are slightly heavier as they are made out of more expensive and heavier fabrics

88001 Navy

88002 Black

88004 Creame Leatherette

88006 Grey Dream

88021 Funny Rings

BASE p 44-45

First Class⁰⁺Base can be used with the Emmaljunga Base

- The Base can be attached to the ISOFIX points in the car
- The Base can be attached with the 3-point safety belt in the car
- First Class⁰⁺Base can then be easily attached on to the Base
- There are light diodes on the Base which indicate correct attachment

Weight: 6.8 kg

84000 Base First Class⁰⁺Base

WHERE CAN I PURCHASE?

Emmaljunga is sold by authorised, professional retailers

Emmaljunga prams can only be bought through one of our authorised retailers which are exclusively in the nursery trade and experts in their field.

Our retailers are well educated in our product range and can give you professional advice in connection with your purchase and also offer excellent after sales service.

We know that your Emmaljunga pram may need some form of service and maintenance after a few years and for this reason Emmaljunga has a well established network of authorised retailers which can offer a high level of service locally for you.

We are dedicated to guaranteeing that you become a satisfied owner of an Emmaljunga pram which can be used for many years to come and perhaps for more than one child.

A list of our retailers and delivery information can be found on our website.

Welcome to Emmaljunga!

MADE IN SWEDEN

Product development for your child's safety since 1925

Long tradition

An Emmaljunga pram is not a mass produced product. Each pram is manufactured with care in our own modern and environmentally adapted factory in Emmaljunga, Sweden. We are proud of being the oldest yet probably the most modern pram factory in Europe.

Handcrafted with modern technology

To enable us to maintain control of the quality of our products, almost all of the components of an Emmaljunga pram are made in our factory in Emmaljunga, Sweden. We bend the tubes, make our own wheels and plastic parts and have our own surface treatment facilities. Certain parts of the process are automated, but other stages are still genuinely handcrafted, such as the assembly of our prams.

Child's safety in focus

Even though the design and appearance of a pram are important factors when a new model is being developed it is always the child's safety that is of primary importance to Emmaljunga. Product development takes place in strict accordance with current safety standards including the European Standard for children's prams, EN 1888, EN1466 and for the car seats, ECE R44/04.

Working with qualified teams

In addition to our own innovative force and experience, we utilise teams of paediatricians, child psychologists and parents, which together with our technicians and development engineers, contribute to the product development process. Together we make an unbeatable team whose primary task is to create a safe and secure pram for your child.

Innovations

Emmaljunga has contributed to several innovations within the field of pram safety. We were one of the first pram manufacturers in the world to introduce the integrated 5-point harness in our pushchairs, which has now been made legislation within the EU. The Hi-Pro head protection and the Newton Hook are also Emmaljunga innovations.

Certified products

In addition to the manufacturing process, our products are frequently inspected and certified by organisations including BSI and TÜV.

Tests and checks

Emmaljunga safety tests all prams in accordance with EN 1888. Our factory has its own test facilities where safety tests are carried out in a laboratory environment.

All prams are quality checked throughout the whole of the manufacturing process, ensuring that both quality and safety are built into the pram during its production in our Swedish factory.

Emmaljunga also has its own test facilities where product and fabric life testing are carried out in a laboratory environment, enabling us to continually improve the durability of our products.

Taking care of your pram

Even though we perform quality and product life tests and only use material of the highest quality, it is still important for you to care for and maintain your pram in order for it to last and work effectively. No pram can remain free from wear and tear, for example, on the wheels and brakes and other moving parts on the chassis. Similarly, no fabric can maintain 100% light fastness if subjected to UV radiation. Follow the care instructions and you will have a lot of pleasure from your pram for a very long time to come!

If something happens to your pram

If you are not pleased with the quality of your pram for any reason, we kindly ask you to contact the retailer from whom the pram was purchased. Emmaljunga follows the statutory rules and regulations valid within the EU.

Material and manufacturing faults are faults that are considered to have existed on the product from the date of purchase (as printed on your receipt). Faults that occur within 6 months from the purchase date are considered to have been present from the time of purchase. Products which on inspection are found to have these faults will be repaired or replaced, if a repair is not deemed possible.

Faults that are found to be the result of an accident, airline damage, neglect, misuse, normal wear and tear or a result of not having correctly followed the care instructions are not valid complaints.

EMMALJUNGA'S FABRICS

Our in-house developed high quality fabrics

An Emmaljunga pram is designed to be used for many years. Our fabrics have to withstand cold winters, hot summers, rainy autumns plus children's dirty boots and sticky fingers! As a manufacturer of high quality products in Scandinavia since 1925, we have a long experience of coping with tough weather conditions and have therefore developed our own fabrics to withstand these conditions. After all, children need to spend 'playtime' outdoors so developing fabrics to cope with these demands is vital. We dare to say that Emmaljunga pram fabrics are in a class of their own.

Protex™

All of our prams from the Model Year 2010 collection (except the Smart and leatherette prams) feature Protex™ fabrics. Protex fabrics are not only dirt repellant and highly water repellant, but they also protect against the sun, wind and cold conditions. Feel the fabric, drip a little water on it, so you can see what Protex is all about. You will appreciate the full benefits when your child insists on playing outside despite the bad weather, or when you are caught out by a sudden downpour of rain! Even though most of our prams are equipped with Protex™ fabrics, which is highly water repellant, we still recommend that you use a raincover when the rain is heavy and persistent. This is to avoid stains appearing on the inner lining caused by the rain mixing with dirt and pushing through the seams in the pram's fabrics. It is also important that you dry and air the pram thoroughly if it gets wet to keep your pram fresh.

Leatherette

This model year our range features exclusive leatherette fabrics in 3 designs - Creme Leatherette, White Croc and Black Croc. This is a very strong and modern material which allows us to create designs on the leatherette such as crocodile print.

Dirt can be removed easily by using a wet cloth and a drop of mild fabric detergent. Our leatherette fabrics are certified according to Ökotex (see below).

Light fastness

All outer fabrics are tested and certified according to BS EN ISO 105-B04:1993. Emmaljunga places very high demands for light fastness on its products. To keep the colours of your pram looking fresh you should try to avoid placing the pram in direct sunlight for long periods of time. Please note! No fabric will remain unaffected after exposure to UV radiation, bad weather and wind.

No harmful substances

All our materials are tested according to EN1888 and EN71, Part 3:1995 and against AZO colouring substances, to ensure that no harmful substances exist in the fabrics. We have also had our leatherette and inner linings tested through Ökotex. Ökotex system ensures that textiles that have passed its tests and been certified do not contain a concentration of any substance harmful to health. ÖkoTex Standard 100 has become a renowned international measure for safety throughout the textile industry.

White Croc

Black Croc

UV-Protection 50+

We have had our base outer fabrics tested according to an Australian/NZ standard concerning UV protection. The fabrics (except Sand colour) handle a UPF (Ultraviolet Protection factor) of 50+ against UPF and UVB radiation. This means that only 1/50 rays goes through the fabrics.

The fabrics protects against 98% of UV-radiation and your child gets a very high protection against the sun from our hoods and parasols.

Care

All fabrics are removable to enable them to be cleaned and the pram to retain its freshness. Follow the care advice supplied with the pram or contact your authorised retailer for care instructions. Fabric samples are available at all our authorised Emmaljunga retailers. Emmaljunga reserves the right against differences between fabric samples and the actual pram fabrics.

Emmaljunga's pram functions vary depending on the model. To find out which functions are included for each model see the overview on page 74-75.

SAFETY

is always the main focus
in Emmaljunga's product development process

Newton Hook

Prams with a reversible handle are equipped with a Newton Hook, a lock which provides an extra safety mechanism

Easy Fix™

Automatic additional lock allowing the simple and secure attachment of the carrycot/seat unit and Travel System Adaptor on to the chassis in both driving directions (two driving directions).

Safe Frame head protection

The backrest on the seat unit has a protective metal frame which is activated automatically when the backrest is lowered.

Hi-Pro head protection

An excellent shock absorbing head protector, which is included with most of our carrycots (not available with the Smart or City Carrycot).

5-point Stretch comfort harness

When your child has fallen asleep and you recline the backrest there is no need to make the belt longer so that the child can sleep comfortably as an extra stretch length has been built into the belt so that it sits perfectly regardless of whether your child is sitting or lying down.

Reflective Seams

For visibility, reflective seams are featured on our fabrics

Cog wheel brake

Provides gentle and effective braking for the wheels.

Brakes

A practical brake pedal is featured on all our prams with cog wheels for increased safety and comfort.

Telescopic handle

Adjust the height of the handle telescopically to suit you for comfortable pushing (Sport chassis only).

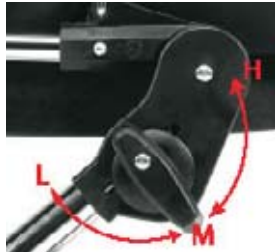

COMFORT

is important for the experience
of the pram's riding comfort

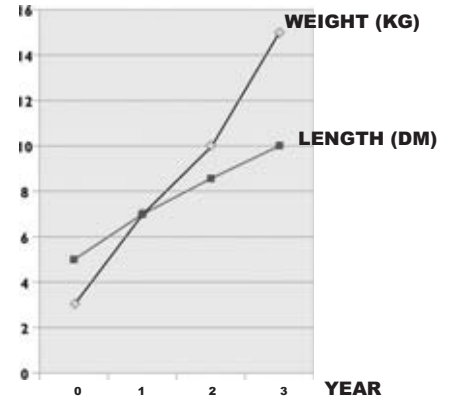

Reversible handle

With one simple movement you can change your child's driving direction to protect against the wind/sun while the child is sitting in the pushchair.

E.A.S.T.™

A child's weight increases five fold during the first 3 years. The child's length is doubled during the same period (see diagram). The E.A.S.T.™ adjustable suspension system allows

you to adjust the suspension (Low/ Medium/High) according to your child's weight and the terrain for maximum comfort.

Swivel front wheels

You can turn and drive "slalom" with ease without pushing down on the handle.

Cradle function

The cradle function allows you to rock your child when the carrycot stands on the floor.

Anti-static mattress

In all our mattresses we use special Oeko-tex-tested fabrics from French Subrenat. Woven with Carbon threads, this fabric reduces static electricity in the child's immediate environment. Mattress supplied in plastic packaging. Manufactured in Sweden.

Thermobase™

The carrycot base is insulated/ventilated for comfort regardless of the weather (Patent nr. 9902334-3)

Adjustable handle

The handle is height adjustable and can be easily adjusted to suit you

Sun/mosquito net

Easily accessible in the hood of most models.
