## Emmaljunga – It's fantastic

# Emmalunga, Made in Sweden since 1925

Emmalunga prams are renowned for their high quality and longevity.

Emmalunga has been manufacturing prams in its own factory, based in Emmalunga, Sweden, since 1925. We have made a conscious choice, as the only pram manufacturer to retain production in Sweden and Europe, to invest heavily in product development and environmental safeguards in our Swedish factory. This means that we are unable to mass produce prams in the lowest price range.

The majority of all prams are now being manufactured in Asia, we are proud to be different and maintain our tradition of craftsmanship in Sweden. Thus, we have maintained our quality control, skills and workplaces in Europe and offer our customers the opportunity to consider not only quality, but also the environment in their purchase.

Our core values of safety, function and design have made Emmalunga a well respected name around the world.

## Choosing a pram

When you begin your search for the right pram, you will see many that look great. But a pram shows its true quality in real life situations. For instance, when it is cold outside and the wind is blowing, when it is raining and the moving parts of the chassis and wheels are exposed to water and dirt. It is when your child spills ice cream on the seat fabrics, when you are tackling uneven terrain, muddy ground and splashing through puddles.

It is in these everyday situations that you can rely on the quality of your pram and feel content that you chose an Emmalunga.

## Welcome to Emmalunga

EMMALJUNGA SWEDEN

EMMALJUNGA SWEDEN

EMMALJUNGA SWEDEN

EMMALJUNGA SWEDEN

# Think of me

Your child should lie securely and comfortably and feel safe and cosy in an Emmaljunga pram.

Everything we have done throughout our history, all of the prams we have built, all the functions and details we have developed over 85 years have been from the perspective of the child without compromise.

## **I want space**

Our carrycots and seat units are amongst the most spacious on the market so that your child can use their pram for as long as is required. We also incorporate exceptional quality stitching and padding in all of our prams so that your child is always comfortable in an Emmaljunga pram. Take a closer look and compare the quality.

## **I want to travel safely**

When you choose a pram your child's safety is the highest priority. Our 2013 pram models already adhere to the new EN 1888:2012 standard for increased safety. We have chosen to sell our prams only through authorised specialist retailers in baby products so that you receive the best possible product service, advice and demonstration, together with excellent after-sales service.

## **I want you to think of my future environment**

Emmaljunga has a clear environmental policy for the materials used to make our prams and for our production facilities. We have all of our prams, fabrics and components tested by accredited laboratories according to current environmental standards. Our factory in Sweden meets tough environmental standards and the transportation routes to most of our markets are short.

## Emmaljunga – focus on the environment

We want to actively participate in creating a good environment for the next generation. Our investments in reducing Emmaljunga's impact on the environment have led to a reduction of our factory's CO<sub>2</sub> emissions by over 400 tons a year. Other active investments within the energy saving arena have resulted in savings of over 750,000kWh of power a year in our production process. We like to say that we take the lead not only in the technical development of prams, but also in creating what is today, one of the world's most energy efficient pram factories. In addition, by maintaining production in Europe, the impact of our transportation activities on the environment is much lesser than that of many of our competitors, whose manufactured products are imported from Asia. Our prams and components are tested by authorised laboratories according to the European chemical regulation, REACH.

We hope you will support our active choice to protect the environment.

# Mondial Duo Combi

Stylish, spacious and fully equipped

Film on  
www.emmalunga.com

Mondial Duo Combi is designed for our fashion conscious customers who want a chic, exclusive, classic and elegant world class 3-in-1. Mondial is based on one of our best-selling prams, which has already received international recognition. As a result, every detail has been tested and refined. With the Mondial, you can enjoy a shopping trip and stay out all day, with a clear conscience, knowing that your child has a comfortable and peaceful environment in the spacious carrycot. The pram can be used as a travel system if you buy an adaptor and Emmalunga's First Class<sup>0+Base</sup> car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit.

# If you want a lighter and more compact pram...

Our City Cross, Nitro and Ozone strollers are perfect for those who want a lighter and more compact pram. They all include a practical stormcover and an integral, pull-out mosquito net and sunshade. When you have chosen a colour, the recommended price\* is the same for City Cross, Nitro and Ozone – you simply choose which model best suits you and your child.

City Cross has four fixed wheels which are ideal for regular use on rough terrain.

Nitro and Ozone feature swivel front wheels for maximum manoeuvrability, perfect for the urban environment. Both of these models have the same chassis and only the seat unit differs. The Ozone seat unit is lighter yet its ergonomic design still allows even the youngest child to sit in comfort.

For your baby's first six months, you can purchase a City Carrycot or City Carrycot Supreme in a choice of colours for each of these three stroller models.

\*according to recommended price list, see [www.emmalunga.com](http://www.emmalunga.com)  
Local variations may occur.

# City Carrycot

## Light and practical carrycot

The City Cross, Nitro, Ozone and Classic Sport Stroller can be converted into light and compact prams with the addition of the City Carrycot for the newborn baby. The lightweight City Carrycot (4.2 kg) has generous inner dimensions (75 cm long) and can be easily attached on to the chassis in place of the seat unit. After 6 months, the City Carrycot can be removed and the seat unit can be used on the chassis.

# City Carrycot Supreme

For those who  
want it all!

City Carrycot Supreme is perfect for those who want it all! A compact carrycot equipped with all the features and functions available with the exclusive Duo Combi.

It features the Thermobase ventilation/insulation system, cradle function, integrated mosquito net, pull-out sunshade and a ventilation window in the hood.

If you want to transform a City Cross, Nitro, Ozone or Classic Sport Stroller into a light and compact pram, you can add City Carrycot Supreme for a newborn. City Carrycot clicks easily and securely to the chassis in place of the seat unit. Despite its low weight (4.4kg) this practical carrycot has generous inner dimensions (75cm long). After six months, you unclock the City Carrycot and fasten the seat unit to the chassis again.

# Polar Performance

365 days a year

Every Emmaljunga pram, whatever the model, is manufactured to withstand extremely tough weather conditions like those we have learned to cope with in Scandinavia. Our specially developed Protex fabrics and windproof aprons are just two examples of how your child is protected from weather and wind in an Emmaljunga pram.

## **The Polar Performance Series (PP) – For those who want it all!**

The Polar Performance Series has been developed to ensure that you can enjoy the great outdoors, whatever the weather. This collection has an eye catching sporty design featuring robust zips and is available in several of our pram models with colour coordinating painted chassis.

### **TPU tyres with mudguards. Sporty handle**

The City Cross, Nitro and Ozone in the Polar Performance feature wheels with mudguards. These prams are also equipped with newly designed TPU tyres that give the pram the comfort of a pneumatic tyre combined with the advantage of a lightweight wheel that doesn't need to be pumped up. The sporty handle provides a sound grip in both warm and cold conditions and completes the off-road experience.

### **City Carrycot Supreme**

City Carrycot Supreme is available in all Polar Performance colours and is equipped with an integral mosquito net and pull out sunshade within the hood, the Thermobase ventilation/insulation system, cradle function and a ventilation window in the hood. This sturdy little carrycot has all the features and functions available with our generous Duo Combi carrycot but in a more compact size.

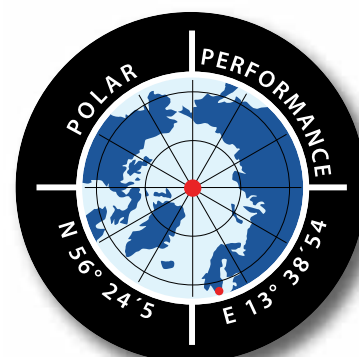

Film on  
[www.emmaljunga.com](http://www.emmaljunga.com)

## **Why choose Polar Performance?**

- sporty design
- developed for the Scandinavian climate
- available in several pram types
- City Cross, Nitro and Ozone come with:
  - colour coordinating painted chassis
  - specially developed TPU tyres
  - new sporty handle

TPU (Thermoplastic Polyurethane) provides outstanding performance in low temperatures as well as high elasticity and a durable surface.

# City Cross

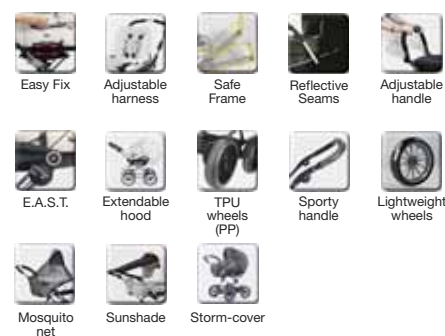

The City Cross has been a great success since its launch together with the City Carrycot. Many parents appreciate its compact size and lightweight chassis. With the addition of new superlight, sporty wheels, the pram now only weighs 12.9 kg with the City Carrycot (see picture below). It has a lightweight painted aluminium chassis combining low weight with comfort, strength and safety. The choice of colour determines the design of the pram: Leatherette colours are supplied on a very exclusive ultra-lightweight chrome steel chassis. Polar Performance (PP) colours come with a painted aluminium chassis, with sporty handle and TPU wheels.

The seat unit is reversible and the stroller can be used from birth with the addition of the City Carrycot or City Carrycot Supreme (see page 20-23). It can be used as a travel system if you buy an adaptor and Emmaljunga's First Class<sup>0+Base</sup> car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit.

- Polar Performance colours feature a painted chassis, TPU tyres and sporty handle
- includes stormcover plus sunshade and mosquito net
- super-light, sporty wheels
- suitable from birth with City Carrycot, City Carrycot Supreme, Quadrolift or Babylift
- tested according to EN1888:2012

City Cross with City Carrycot (accessory)

If you want a light, neat City Cross that attracts attention, the new City Cross Leatherette pram is a perfect choice. We have worked hard to perfect the details, and have combined this exclusive pram with an ultra light chrome chassis. The weight is almost the same as an aluminium chassis, but has a totally different look! City Carrycot Supreme in Leatherette has everything you could wish for, and at the same time is light and compact. Emmaljunga's Leatherette fabrics from Germany are Class 1 Ökotex certified, the strictest environmental classification for child safety.

# City Cross

Leatherette – Luxury on a light chrome chassis

## Light and practical

Film on  
www.emmalunga.com

Nitro is a slimline yet tough stroller which has become very popular among parents. Simple, lightweight (only 11,3 kg with the City Carrycot) and practical for urban travel on buses and the underground. The stroller is extremely narrow (57cm) and very flexible with swivel front wheels, which allow you to turn the stroller on the spot and move easily through busy city streets and shopping centres. Despite the pram's minimal outer measurements, the seat unit is very generous (90cm long x 32cm wide). These are the same dimensions as most other Emmalunga prams, allowing your child to use the seat unit in comfort up to approximately 3 years of age. The seat unit is reversible and the stroller can be used from birth with the addition of the City Carrycot or City Carrycot Supreme (page 20-23), Quadrolift or Babylift. Nitro can be used as a travel system if you buy an adaptor and Emmalunga's First Class<sup>0+Base</sup> car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit.

## Ideal city stroller

Film on  
www.emmalunga.com

Ozone builds upon our successful lightweight Nitro chassis with the addition of a new superlight seat unit. Ozone is a simple, extremely lightweight stroller (11 kg with the seat unit and 11,3 kg with the City Carrycot). It is extremely narrow (only 57cm) and very flexible with swivel front wheels, which allow you to turn the stroller on the spot and move easily through busy streets and shopping centres. The lightweight seat unit makes it easy to take the stroller in and out of the car, yet its generous dimensions (105cm long) mean that your child can use the stroller in comfort up to the age of 3 years. Its ergonomic design provides an excellent sitting position for even the smallest child. The seat unit is also reversible and has three recline positions.

The stroller can be used from birth with the addition of the City Carrycot or City Carrycot Supreme (page 20-23). Ozone can be used as a travel system if you buy an adaptor and Emmalunga's First Class<sup>0+</sup> Base car seat.

Scooter<sup>2.0</sup> is a simple and practical stroller (not suitable from birth). It is one of Emmalunga's strongest, lightest, and most versatile models. It combines quality with a very reasonable price and is therefore a strong favourite in our range. Scooter<sup>2.0</sup> tackles a variety of terrains with ease. Enjoying a stroll on the beach, a ramble through the forest or trudging through the snow is not off limits. Scooter<sup>2.0</sup> is perfect for those who require a buggy that is easy to push, can be taken anywhere, is simple to use and compact to fold.

It can be used from the time when your child is able to sit up unaided. To make the 5-point harness a more suitable fit for a 6 month old baby, you can buy the Minimizer/Seat Pad (accessory).

## Compact manoeuvrable stroller

It's here! The long awaited Scooter with swivel wheels. We have combined our successful Scooter 2.0 chassis with lightweight front swivel wheels to offer maximum manoeuvrability for city streets.

Scooter S has all the benefits of the Scooter 2.0 – it is a great stroller (not suitable from birth), one of Emmaljunga's strongest yet most flexible and lightest models. The front swivel wheels can also be fixed for the beach, forest or any other uneven terrain.

Scooter S is suitable for use from the time the child can sit unaided. To make the 5-point harness a more suitable fit for a 6 month old baby you can add our Minimizer/Seat Pad accessory.

# monkey

1.

For the first 6 months, a Monkey and a carrycot are sufficient.

2.

When your child gets older, it's time to attach the seat unit.

3.

If a little brother or sister arrives, you can buy a Double Monkey chassis and attach your carrycot and seat unit.

4.

Of course you can use Double Monkey with two carrycots.

5.

And you can also attach two seat units to Double Monkey. The seat units are reversible so you can choose in which direction the children will face.

6.

When the oldest child doesn't want to sit in the pram any longer, you can use the single Monkey chassis again.

Emmalyung

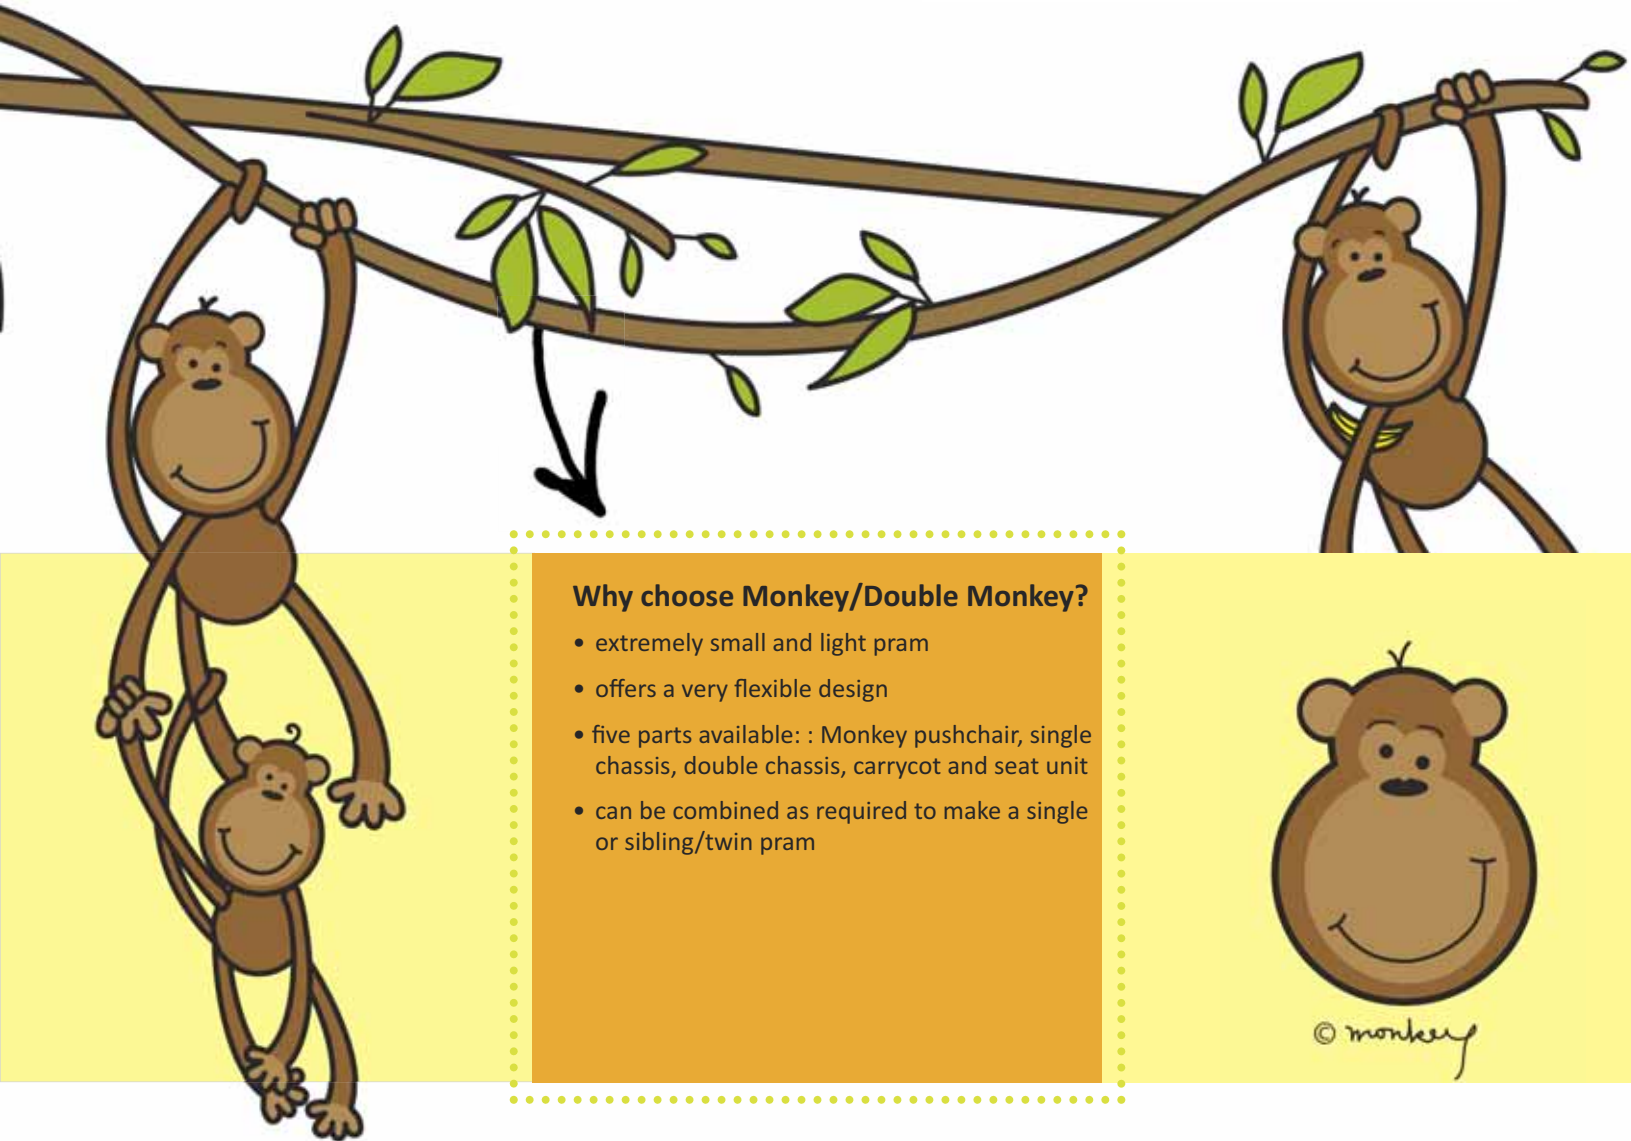

# Monkey and Double Monkey

Go Bananas!

Monkey is our small city stroller that gives you all combinations from a single pram to a sibling pram depending on how many children you have. Because you can purchase Monkey as a pushchair or a separate chassis, seat unit and carrycot, you can combine the parts into a single or double pram exactly as you need it. And if a little brother or sister arrives, you don't have to purchase a whole sibling pram but simply complement your Monkey with a Double Monkey chassis; you already have the rest.

From 6 months – 3 years  
From newborn with Monkey Carrycot

## Double City Cross

For twins, sisters and brothers

For many years, Double City Cross has been a favourite with parents of twins and siblings. It has been developed to give your children every possible comfort and to facilitate travel across all sorts of terrain. It is suitable from birth with the addition of one/two Duo Lift/s. The painted aluminium chassis is lightweight and provides comfort, strength and security. An added benefit are the tubeless lightweight wheels. Find more information at [www.emmaljunga.com](http://www.emmaljunga.com)

27306 Double City Cross Nature

# Classic Sport

## A practical classic with air wheels

Emmaljunga's Classic Sport Stroller has been a worldwide bestseller for over a decade and is suitable for use from 6 months. The stroller can be used from birth with the addition of a City Carrycot, City Carrycot Supreme, Babylift or Quadrolift. The Classic Sport Stroller can also be used as a travel system if you buy an adaptor and Emmaljunga's First Class<sup>0+Base</sup> car seat. If your family grows you can attach a Toddler Seat (accessory) to the seat-unit. Find more information at [www.emmaljunga.com](http://www.emmaljunga.com)

23306 Classic Sport Nature

# Cerox<sup>2.0</sup>

## Compact and robust

Cerox<sup>2.0</sup> is a fantastic "all-rounder", with a generous seat unit (90cm long). Already a true Emmaljunga classic, the original Cerox has recently been upgraded with the addition of a newly designed hood and tough new lightweight wheels. Robust and compact with a sturdy lightweight steel chassis, the Cerox<sup>2.0</sup> also features a reversible handle, which allows you to change the direction your child is facing quickly and easily. The handle can be reversed while the child is sitting in the stroller - a practical feature for instance if the sun or wind is bothering your child whilst facing forwards. **New!** Now with the integral mosquito net and sunshade in the hood. The stroller can be used from birth with the addition of the Babylift or Quadrolift accessory. Find more information at [www.emmaljunga.com](http://www.emmaljunga.com)

20304 Cerox<sup>2.0</sup> Denim Blue

# Smart

## Affordable and good

Smart is a spacious and robust Duo Combi with a generously sized seat unit and carrycot. In comparison with our fully-equipped Mondial and Edge Duo Combi, the number of features and functions has been scaled down to create a high quality Emmaljunga pram which offers exceptional value. The Smart Duo Combi has everything your child needs from birth to three years: carrycot, reversible seat unit, adjustable handle for comfortable pushing, dual purpose hood which can easily be transferred from the carrycot to the seat unit (excluding hood skirt), mattress, integrated 5-point harness, dual purpose apron for the carrycot and seat unit and a reversible footrest cover. The pram can be used as a travel system if you purchase a car seat adaptor and the Emmaljunga First Class<sup>0+Base</sup> car seat. Find more information at [www.emmaljunga.com](http://www.emmaljunga.com)

10310 Smart Capri Creme

*\*Only available on certain markets*

# Spider

## Light and durable buggy

Spider is our smallest ever Sulk/buggy - a great model that is light, yet durable with a simple design. This little buggy is appreciated by parents who require their stroller to be as small as possible - great for shopping trips or holidays. Spider is compact and practical - its strength lies in the chassis' slim steel tubing. With its simple seat design featuring a recline position, it is perfect to keep in the car and take on holiday. The chassis can be folded with a simple one foot action to give you a light (8.8 kg), compact unit. Spider does not feature a hood, but it is great for short journeys with your little 'Spidermen' and ladies, already kitted out in their rubber boots and rain clothes and ready to go when they arrive at the nursery, the beach or forest. The fabrics are removable and washable. A simple sun canopy is available as an accessory. Find more information at [www.emmaljunga.com](http://www.emmaljunga.com)

## Safety – from car to pram

Newborn- approximately 1 year (0-13kg)  
Colours and detailed information: page 89  
Technical information: page 96  
Accessories: page 98

Film on  
[www.emmaljunga.com](http://www.emmaljunga.com)

Your baby's first journey in life is most probably from the maternity ward to your home. From this time forward there will be many more journeys for you and your baby to make and for these journeys, it is vital that your baby travels in a secure car seat. Emmaljunga has spent several years developing its First Class<sup>0+Base</sup>, a tough and well designed car seat, which meets the high standards required with regard to safety, choice of materials, comfort, ergonomics, user friendliness and design, which makes the product an outstanding choice.

If you do not want to wake your child after a car journey you can simply remove the car seat from the car and click it on to most of our Emmaljunga chassis (travel system adaptor is required) and you're ready to go.

The car seat can also be attached in the car with our Isofix Base. Further information can be found on page 48 and at [www.emmaljunga.co.uk](http://www.emmaljunga.co.uk)

### FACTS

Suitable from birth to approximately 1 year (0–13 kg):  
Norm ECE R 44/04

Group 0+, up to 13 kg

- Emmaljunga's own in-house designed and developed car seat
- can be fitted in the car with the seat belt or the Emmaljunga Isofix Base
- when used with the Base in the car the First Class<sup>0+Base</sup> can be taken quickly and easily in and out of the car

For more information regarding the Base please see page 48 and our website: [www.emmaljunga.co.uk](http://www.emmaljunga.co.uk)

### Functions

- adjustable head protection
- automatic optimisation of the child's lying curve
- automatic adjustment (lengthways) of the 5-point harness
- central and easily accessible harness adjustment (harness length)
- side impact head protection
- multi-position handle with one hand regulation
- storage compartment in the back of the seat
- shoulder harness protection pads
- washable fabrics (without having to interfere with the car seat's 5-point harness)
- attachment points for fitting on to the adaptor/pram and Base
- easily accessible instruction manual
- mini hood included

**WARNING!** Never assemble a rearward facing car seat in the front seat if there is an airbag. Death and serious injury can occur.

### Why choose First Class<sup>0+BASE</sup>?

- safe car travel for your baby
- easy to use
- colours available to coordinate with your pram
- soft and comfortable
- ergonomic lying curve that can be adjusted as your child grows
- can be attached to most Emmaljunga prams using an adaptor

# Base for First Class<sup>0+BASE</sup>

A safe way  
to save time

Do you travel a lot and make many short journeys where you have to take your child in and out of the car?

The Emmaljunga Isofix Base is the perfect solution. It makes it even simpler to attach and remove your First Class<sup>0+Base</sup> car seat from the car. The base is a secure platform that can be fitted securely utilising the car's Isofix attachment points. Simply attach the base to the Isofix points, then attach the First Class<sup>0+Base</sup> car seat to the base with a click and you're ready to go!

Newborn to approx. 1 year (13 kg)

The base is modern, secure and practical. LEDs indicate that the base is correctly fitted in the ISOFIX points and that the seat is firmly attached to the base.

You can easily move the base between cars: simply undo it from the ISOFIX points with a simple movement and then fold up the support foot.

The Emmaljunga Base is entirely manufactured in Sweden.

84300 Base First Class<sup>0+base</sup>

## Why choose First Class<sup>0+BASE</sup> Base?

- modern, secure and practical
- attach the car seat into the car with a simple click
- equipped with LEDs for safe use
- manufactured in Sweden
- certified according to ECE R44/04

# Travel System First Class<sup>0+BASE</sup>

With the Travel System Adaptor you can attach the First Class<sup>0+base</sup> car seat to most of our prams\*:

The adaptor has two recline positions - one is slightly more upright than the other which reclines a little to allow your child to sleep more comfortably. We also offer adaptors for other leading car seat manufacturers so you can attach these onto your Emmaljunga pram. For further information please look at: [www.emmaljunga.co.uk](http://www.emmaljunga.co.uk)

# Quadrolift

## Functional and supersoft

From newborn– 3 years  
Accessories page 98

The Quadrolift is a clever and innovative product incorporating four practical functions in one item. It can be used as a cocoon, a lift, a footmuff and a seat pad with a winter and summer lining. We have chosen the softest and highest quality materials to make this product. Quadrolift is available in 28 colours and fits into most Emmaljunga prams. Quadrolift offers 4 practical solutions in one and the same product.

### 1. Cocoon

Perfect for use in Emmaljunga's 3-in-1s. Place the Quadrolift straight into the carrycot part. There are many advantages. For instance, in situations where it is impractical to take your pram along - such as the doctor's surgery, a restaurant or into a flat - you can remove your baby from the carrycot in the cocoon where the child can continue to lie in comfort. You can also reverse the mattress and choose between the cosy fur fabric for the winter or soft cotton fleece for the summer.

### 2. Lift

If you buy an Emmaljunga pushchair without a carrycot for a newborn, you can convert the pushchair into a luxurious pram with the Quadrolift. If you remove the bumper bar and attach the Quadrolift in the stroller, it can easily be used from birth.

### 3. Winter/summer footmuff

When your child can sit unaided and you have converted your 3-in-1 pram into a pushchair, the Quadrolift can be used as a footmuff to ensure your child's legs are kept warm. The footmuff can be easily attached to the seat unit with the aid of the clips provided. You can reverse the liner in the footmuff and choose between cosy teddy bear fabric for the winter or soft fleece for the summer.

### 4. Winter/summer seat pad

The Quadrolift can also be used as a comfortable seat pad by removing the liner from the Quadrolift and attaching it easily in to the stroller. The pad is reversible so you can choose between cosy fur for the winter or soft cotton fleece for the summer.

### Why choose Quadrolift?

- clever design
- multifunctional product
- super soft high quality material

63317 Quadrolift Vanilla Leatherette

# Toddler Seat & Toddler Roller

If your family grows...

75302 Toddler Seat Black

From 1 year – approximately 3 years  
(max weight 15 kg)

Technical information page 90

## Toddler Seat

With the Emmaljunga Toddler Seat you can take your older child along on short walks. The Toddler Seat is assembled onto the seat-unit. The advantage with the Toddler Seat is that you get a narrow and practical stroller which folds compactly despite the fact that it can carry two children. Although it provides more limited space and comfort than one of our twin/sibling strollers. Please ensure that you follow our safety instructions for the Toddler Seat thoroughly to avoid the stroller becoming unbalanced. The Toddler Seat can be attached on to the seat unit of specific Emmaljunga models: Edge 3-in-1, Mondial 3-in-1, Smart 3-in-1, Classic Sport Stroller, Nitro, and City Cross. With the addition of a Quadrolift, a small baby can be placed in the stroller whilst an older child travels in the Toddler Seat. The Toddler Seat is available in 2 colours (Navy and Black).

Toddler Roller for chassis with oval tube brake axle  
(Art no. 71300)

Toddler Roller Classic Chassis  
(Art. No. 74300)

From approximately 2 years – approximately 5 years (max weight 20 kg)

Technical information page 90

## Toddler Roller

If you want to take a walk with two children you can buy an Emmaljunga Toddler Roller, which can be attached easily on to most of our chassis. The Toddler Roller can easily be clicked on and off and if you do not need it during your journey, you can attach it by a strap to the handlebar.

Emmaljunga offers the following Toddler Rollers:

Art no. 71300: compatible with Sport Chassis, Duo S, Nitro, Ozone, City Cross, Cerrox<sup>2.0</sup>, Double City Cross, Monkey, Double Monkey

Art no. 72300: compatible with Scooter<sup>2.0</sup>, Scooter S, Monkey

Art no. 74300: compatible with Classic

### WARNING!

*Never let go of the stroller handle when a child is placed in the Toddler Seat. Always take the child out of the Toddler Seat first, before removing the second child from the stroller. If you are walking for long periods we recommend that you buy a twin pushchair since it will give both children the chance to rest comfortably and sleep during journeys.*

## Why choose Toddler Seat/ Toddler Roller?

- ideal for siblings
- handy when your child doesn't want to walk
- easy to assemble

0-6 months

6 months – 3+ years

# Changing Bags

Organised in style  
– Packed and  
ready to go!

## Style Changing Bag

Our new Style Changing Bag is a luxurious mixture of the Exclusive and Sport Changing Bag. It features the practical inner pockets of the Exclusive Changing Bag combined with the generous storage capacity of the Sport version. The base of the Style Changing Bag has been made wider, providing plenty of space to carry bottles, nappies, towels and other items. The changing matt features a shiny, woven satin fabric, allowing your baby to lie in comfort. Indulge in a little luxury every day!

## Why choose an Emmaljunga changing bag?

- available in colours to match your pram
- practical
- designed to hold everything your baby needs
- works perfectly as a handbag
- style changing bag comes in black
- exclusive changing bag available in three Leatherette colours
- Sport changing bag available in 25 colours

## Exclusive Changing Bag

The popular Exclusive Changing Bag is in essence a modern and spacious handbag including a changing mat. It also features plenty of practical and easily accessible storage compartments for nappies, bottles, mobile phones, and much more. Even when your children are older, you can still enjoy using it as a stylish handbag.

## Sport Changing Bag

This new changing bag has a sporty look and is designed to provide maximum space for towels and other items when you are on an outing for instance to the beach or pool. It includes a changing mat and features plenty of practical storage compartments for nappies and much more. An exceptionally lightweight bag with a modern, sporty design which both mother and father will be happy to carry.

# Relax and research at home

On our website you will find current information, product movies, news, delivery times and our latest colours. Emmaljunga only sells through our network of authorised retailers as we want you to have the opportunity to experience and test drive our prams before you make your decision.

Our authorised retailers always have an up to date, representative range of Emmaljunga prams in their showrooms, covering our wide collection of models from large spacious combination prams (Duo Combis) to our flexible, lightweight city strollers (Scooter, City Cross, Nitro and Ozone).

We are proud of the exceptional comfort and quality that the Emmaljunga brand represents. Therefore, we would like to invite you to visit your nearest authorised retailer to discover Emmaljunga's true value.

**You can find a retailer list on our website.**

**Or scan here:**

## 2D Barcodes SCANLIFE

On many pages in the brochure you will find 2D barcodes. You can scan these with your Smart phone to receive more information or view product movies directly on your mobile phone.

# Emmaljunga®

# Where to buy Emmaljunga

Emmaljunga prams are only sold through authorised retailers in stores. We want you to have the opportunity to test-drive Emmaljunga prams in store so you can experience their quality and comfort before you make your decision. You will be using the pram almost every day over the next few years. That's why it's important that you choose the right pram; one that suits you and your needs.

Our authorised retailers always have a current representative range of Emmaljunga prams in their showrooms, covering our wide collection of models from large, spacious combination prams (Duo Combi) to light, compact city strollers (Scooter, City Cross, Nitro and Ozone).

Emmaljunga's retailers are trained in our range, and they will help you to find the right pram and offer you excellent after-sales service. Here you will also find colour swatches featuring all of our fabrics, together with our catalogues.

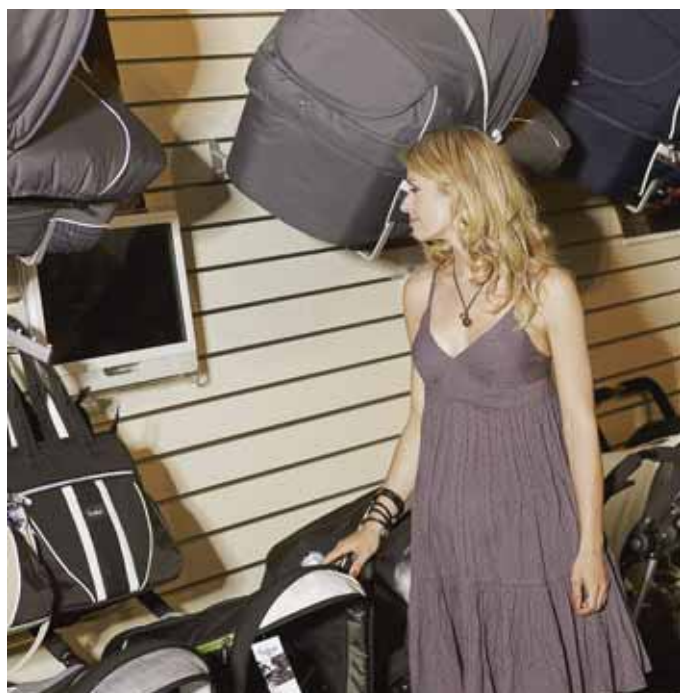

We are proud of the excellent comfort and quality that the Emmaljunga brand represents. And we would like to invite you to visit your nearest store so you can discover Emmaljunga's true value.

**You can find a list of retailers on our web-site:  
[www.emmaljunga.com](http://www.emmaljunga.com), or scan here:**

Your retailer also offers service inspections according to the service plan that accompanies your Emmaljunga pram.

NB! Service inspections are optional and contribute to extending the lifetime of your pram. Service inspections are services that entail costs and do not affect the warranty or warranty obligations.

# Find your Emmaljunga pram – we offer prams in a

**Price:**  
Prams fall into different price classes depending on the design and fabric. You can find our recommended prices on [www.emmaljunga.com](http://www.emmaljunga.com) under Customer Service.

## XL

Fully equipped and spacious 3-in-1.  
Great for town and also easily manoeuvred on country walks.

### Fully equipped prams – for all weather conditions

Most of our prams are fully equipped so your child is completely protected and comfortable in all weathers. You don't have to buy a lot of additions to cope with the weather, because everything comes with your Emmaljunga pram, including a stormcover and an integrated mosquito net in the hood. New for this year is an additional built-in pull-out sunshade in the hood. You can see what comes with your pram in the list opposite.

### Duo Combi

When you purchase a spacious Mondial or Edge Duo Combi, both the carrycot and seat unit are included. Start with the carrycot for your baby, and then change to the seat unit when your child grows; it's easy.

### City Cross, Nitro, Ozone

These compact and light models can be used from birth if you add a City Carrycot (page 20) or a luxurious City Carrycot Supreme (page 22). You simply exchange the pram's seat unit for the City Carrycot and click it into place. As your child grows, you change back to the seat unit again.

If you would rather use a Lift accessory for your baby instead of a carrycot, our City Cross, Nitro and Cerox models can also be used with a Lift. Choose between a Quadrolift or a Babylift. To use a lift for your baby, you recline the seat unit and insert the lift.

### Pure strollers

Scooter<sup>2.0</sup>, Scooter S and Spider are pure strollers intended for children from approx. 6 months. Not suitable for newborns.

### FirstClass<sup>0+Base</sup>

Apart from being used in the car, FirstClass<sup>0+Base</sup> car seat (page 46) can also be clicked onto certain pram chassis to create a Travel System using our Travel System Adaptor.

### Double pram

Emmaljunga's double pram, Double City Cross, can be used for twins with two twin Duolifts, and for baby and an older sibling with a twin Duolift.

Mondial 3-in-1  
Stylish and fully equipped

Edge 3-in-1  
Spacious and fully equipped

**A market leading 3-in-1 with maximum comfort and space for your child. With its impressive range of features and functions, this pram is hard to beat! The Chassis is comfortable and stable with reversible seat unit.**

- Suitable from birth to approximately 3 years.  
Fully equipped for use from birth to 3 years of age:
- carrycot with cradle function
  - Thermobase Ventilation
  - anti-static mattress
  - head protection
  - ventilation window in the hood
  - The hood can easily be exchanged between the carrycot and seat unit
  - long seat unit (90 cm)
  - reversible seat unit to change child's travel direction
  - stretch comfort 5-point harness with height adjustment
  - Safe frame head protection in the seat unit

XS 2X

The concept with the Monkey family of products is to provide a travel solution for your first child, second child or twins. You can purchase Monkey as a complete single pram or combine chassis, seat unit and carrycot components to create a sibling/twin pram as you require. If you are expecting a second child and already have a Monkey pram, you simply have to buy a Double Monkey chassis – you already have the seat unit and carrycot and are ready to go!

Monkey and Double Monkey  
Simple – affordable – intelligent!

**A little pram that can be extended into a sibling pram. With practical front swivel wheels. The pushchair only weighs 11 kg (with carrycot 11.4 kg).**

Suitable from 6 months to approx. 3 years.

- can be used from birth with Monkey Carrycot
- seat unit and carrycot can be reused later as a sibling pram
- steel/cryptonite chassis for strength and safety
- only 53 cm wide and weighs just 11 kg
- tubeless ball-bearing wheels (rear wheels)
- double lightweight front swivel wheels
- very light and narrow seat unit, also designed for use as sibling seat unit later as required
- reversible seat unit to change the child's driving direction
- height adjustable handle
- adjustable footrest
- can be complemented with Toddler Roller
- possibility of Travel System with First Class0+base car seat

#### Single Monkey

Chassis weight: 6.4 kg

## Choose between 4 different chassis with the Mondial and Edge 3-in-1

### CLASSIC CHROME CHASSIS

An award winning chassis, which is very stable and compact with a reversible seat unit and spacious steel tray. The handle is adjustable lengthways and the patented adjustable E.A.S.T. suspension system can be adjusted to suit the child's weight and the terrain. Delivered complete with Emmaljunga's own in-house designed and developed white walled, ball bearing air wheels.

Weight chassis: 7,0 kg  
Weight wheels: 3,6 kg  
Weight seat unit: 6,1 kg  
Weight carrycot: 5,6 kg  
Outer measurement folded: 91 x 59 x 51 cm  
(incl. wheels, length x width x height)

17390 Classic Chrome Chassis

### CLASSIC CRYPTONITE CHASSIS

An award winning chassis which is very stable and compact with a reversible seat unit and spacious steel tray. The handle is adjustable lengthways and the patented adjustable E.A.S.T. suspension system can be adjusted to suit the child's weight and the terrain. Delivered complete with Emmaljunga's own in-house designed and developed black walled ball bearing air wheels.

Weight chassis: 7,0 kg  
Weight wheels: 3,6 kg  
Weight seat unit: 6,1 kg  
Weight carrycot: 5,6 kg  
Outer measurement folded: 91 x 59 x 51 cm  
(incl. wheels, length x width x height)

17391 Classic Cryptonite Chassis

### SPORT CRYPTONITE CHASSIS

A robust chassis which features a telescopic height adjustable (lengthways) handle which is also reversible for when for example, the sun or wind bothers your child whilst facing forwards and a spacious fabric tray. Delivered complete with Emmaljunga's own in-house developed black/grey walled ball bearing air wheels.

Weight chassis: 8,9 kg  
Weight wheels: 4,0 kg  
Weight seat unit: 6,1 kg  
Weight carrycot: 5,6 kg  
Outer measurement folded: 96 x 67 x 52 cm  
(incl. wheels, length x width x height)

17392 Sport Cryptonite Chassis

### NEW! DUO S CHASSIS

Our new and exclusive Duo Combi chassis with swivel wheels. Features sporty handle and tubeless 310/320 lightweight tyres in alu-look. The seat unit is reversible and the handle is height adjustable. Spacious fabric tray. **Weights only 14,1 kg with carrycot.**

Weight chassis: 7,3 kg  
Weight wheels: 1,2 kg  
Weight seat unit: 6,1 kg  
Weight carrycot: 5,6 kg  
Outer measurements folded: 93x57x56 cm  
(incl wheels, length x width x height)

## QUALITY – SAFETY – FUNCTION

# Emmalunga manufactures quality prams

For us, quality is a natural result of our choice to use only the best materials, that we fulfil the latest safety standards, develop practical functions and construct prams for durability and longevity.

Your Emmalunga pram incorporates many features that are not always visible on the surface. On the following pages we give you an overview of the interior of an Emmalunga pram. Quality becomes even more apparent the more you use your pram.

Emmalunga's functions vary depending on the pram model. The functions that are included are indicated in the comparison table on pages 96-97. You will also find the relevant icons on the model page in this brochure.

### Extendable hood

The hood can be extended so that your child is protected from sun and adverse weather.

### Cradle function

The cradle function allows you to rock your child when the carrycot stands on the floor. (Mondial/Edge carrycot//City Carrycot Supreme only)

### Swivel front wheels

You can turn and drive "slalom" with ease without pushing down on the handle.

### Telescopic handle

Adjust the height of the handle telescopically to suit you for comfortable pushing (Sport chassis only).

### High Pro head protection

Shock absorber. Protects your child's head. Included in most of our carrycots (not Smart and City Carrycot/Supreme).

### Newton Hook

Prams with a reversible handle are equipped with a Newton Hook, a lock which provides an extra safety mechanism

### 5 point stretch comfort harness

We have built in extra stretch into the 5 point harness so that it always fits with perfect comfort. Most of our 2013 models also have a height adjustable harness function.

### Safe Frame head protection

The backrest on the seat unit has a protective metal frame which is activated automatically when the backrest is lowered.

### Reversible handle

With one simple move-ment you can change your child's driving direction to protect against the wind/ sun while the child is sitting in the pushchair (Sport Chassis only).

#### Mudguards

Removable mudguards great and and also protect against dirt.

#### Sporty handle

Sporty handle provides a good grip whatever the weather.

#### Mosquito net

There is an integral, pull-out mosquito net in the hood which can be attached to the front of the pram.

#### Sunshade

There is an integral, pull out sunshade in the hood which can be attached to the chassis handle.

#### TPU wheels

TPU wheels give increased grip on asphalt and sand.

#### Thermobase™

The carrycot base is insulated/ventilated for comfort regardless of the weather (Patent nr. 9902334-3).(Mondial/ Edge carrycot//City Carrycot Supreme only)

#### Reflective Seams

For visibility, reflective seams are featured on our fabrics

#### Adjustable handle

The handle is height adjustable and can be easily adjusted to suit you.

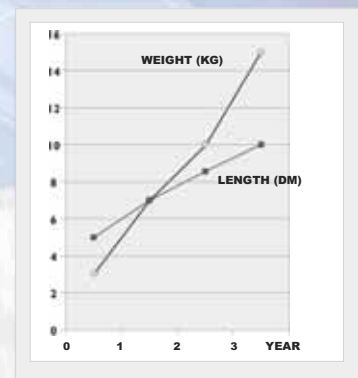

#### Easy Fix™

Automatic additional lock allowing the simple and secure attachment of the seat unit (in both driving directions), the carrycot and Travel System Adap-tor on to the chassis.

#### E.A.S.T.™

For perfect comfort, you can adapt the suspension to the weight of the child and the terrain. On prams with swivel wheels, you can adjust the angle of the seat unit/carrycot.

## An eye for detail

TPU tyres on hard surface

TPU tyres on sand/snow

### TPU tyres

Is Emmaljunga reinventing the wheel? With Emmaljunga TPU Marathon wheels, we have combined the comfort and driveability of pneumatic tyres with the puncture-free properties of EVA tyres. The tyres consist of an outer covering made of the extremely tough TPU material. The outer TPU covering functions like a rotating sole and gives the tyre increased longevity whilst rolling resistance is reduced to less than half that of a normal EVA tyre! You will immediately notice the difference on smooth ground when only the TPU sole is in contact with the terrain.

On softer surfaces, the TPU sole sinks in and the whole tyre's breadth begins to work to keep the weight of the pram centred. The result is that you get the best of both worlds. And of course as an Emmaljunga owner, you may be the first on the beach or in your town with these wheels – and perhaps the only one? The system is patent pending.

### Safe Frame

Emmaljunga SafeFrame™ is constructed to provide maximum comfort and safety in each recline position. There are three positions; upright and resting with extended head support to the back, and a sleeping position where the upper part automatically transforms into a protective frame for your child's head without requiring fiddly adjustments. The seat unit is cushioned with padded fabric and the integrated, adjustable 5 point harness has a stretch function for maximum comfort regardless of your child's position.

### E.A.S.T.™

Your child's weight increases five-fold in the first three years. Your child's length doubles in the same period. Adjustable suspension, E.A.S.T.™, means that you can adapt the suspension (Low/ Medium/High) to the weight of your child and the terrain to obtain maximum comfort.

On prams with swivel wheels, you can use this system to adjust the angle of the seat unit/carrycot.

Aluminium tubes

Steel tubes

### Emmaljunga's tubes – "Perfectly Round"

Emmaljunga's tubes are round. We have a principle that our designers follow – "Perfectly Round". No geometric shape is stronger in all directions at the same time than the circle, and the extended circle is the perfect construction tube for your pram. Oval aluminium profiles are more about fashion and appearance than true durability. Emmaljunga master the properties of the round tube in all directions, and that's why we construct our prams with three-dimensional curved tubes rather than straight profiles that transfer lateral forces with plastic parts and a few rivets. Choose whether you want aluminium or the ultra high strength steel tubes manufactured from Docol 900 made by Sweden's SSAB.

### Surface treatments of tubes

Our **super-light steel** tubes from Sweden's SSAB made of Docol 900 are extremely strong. Our own surface treatment system involves the application of three different layers of nickel, sealed with chrome or matt chrome/cryptonite to give your pram an extra fine finish. Our **aluminium** tubes are surface treated with an aluminium sealing coat, which is then painted and finally varnished to obtain maximum strength and a high gloss finish.

### Hi-Pro

Emmaljunga's Mondial/Edge Duo Combi carrycots are equipped with head protection placed behind the inner fabric. On the inside of the head protection is a shock absorbent, soft, air-filled material, and on the outside is the protective hard shell.

Emmaljunga's Hi-Pro™ protection provides your child with increased security against unforeseen events in a busy daily schedule; everything from open doors to table edges and other objects that can collide with the carrycot.

### Thermobase™

Warmth and humidity in the summer and cold winters are typical for our Nordic climate. Emmaljunga's patented Thermobase handles both conditions perfectly, with a warm insulated bottom that is able to regulate the ventilation beneath the mattress. All carrycots that are equipped with Emmaljunga's Thermobase™ also have the practical cradle function integrated on the underside of the carrycot. Great to have with you on short visits to friends and family.

# Emmaljunga's Fabrics

# Tests

## Our in-house developed high quality fabrics

An Emmaljunga pram is designed to be used for many years. Our fabrics have to withstand cold winters, hot summers, rainy autumns plus children's dirty boots and sticky fingers! As a manufacturer of high quality products in Scandinavia since 1925, we have a long experience of coping with tough weather conditions and have therefore developed our own fabrics to withstand these conditions. After all, children need to spend 'playtime' outdoors so developing fabrics to cope with these demands is vital. We dare to say that Emmaljunga pram fabrics are in a class of their own.

## Protex™

All of our prams from the Model Year 2013 collection (except the Smart and leatherette prams) feature Protex™ fabrics. Protex fabrics are not only dirt repellant and highly water repellant, but they also protect against the sun, wind and cold conditions. Feel the fabric, drip a little water on it, so you can see what Protex is all about. You will appreciate the full benefits when your child insists on playing outside despite the bad weather, or when you are caught out by a sudden downpour of rain! Even though most of our prams are equipped with Protex™ fabrics, which are highly water repellant, we still recommend that you use a raincover when the rain is heavy and persistent. This is to avoid stains appearing on the inner lining caused by the rain mixing with dirt and pushing through the seams in the pram's fabrics. It is also important that you dry and air the pram thoroughly if it gets wet to keep your pram fresh.

## Leatherette fabrics

We use high-quality, exclusive leatherette from Germany. The fabric is ÖKOTEX certified with the strictest class 1 certification for child safety. It is a very hard wearing and fashionable material. Dirt can easily be removed with a damp cloth and a drop of washing up liquid.

## Light fastness

All outer fabrics are tested and certified according to BS EN ISO 105-B04:1993. Emmaljunga places very high demands for light fastness on its products. To keep the colours of your pram looking fresh you should try to avoid placing the pram in direct sunlight for long periods of time. Please note! No fabric will remain unaffected after exposure to UV radiation, bad weather and wind.

## No harmful substances

All our materials are tested according to EN1888 and EN71, Part 3:1995 and against AZO colouring substances, to ensure that no harmful substances exist in the fabrics. All our fabrics are tested thoroughly through accredited laboratories to comply with the EU regulations.

## UV-Protection 50+

We have had our base outer fabrics tested according to an Australian/NZ standard concerning UV protection. The fabrics handle a UPF (Ultra-violet Protection factor) of 50+ against UPF and UVB radiation. This means that only 1/50 rays goes through the fabrics. The fabrics protects against 98% of UV-radiation and your child gets a very high protection against the sun from our hoods and parasols.

## Tests and checks

Emmaljunga safety tests all prams in accordance with EN 1888. Our factory has its own test facilities where safety tests are carried out in a laboratory environment.

All prams are quality checked throughout the whole of the manufacturing process, ensuring that both quality and safety are built into the pram during its production in our Swedish factory.

Emmaljunga also has its own test facilities where product and fabric life testing are carried out in a laboratory environment, enabling us to continually improve the durability of our products.

## Certified products

Our manufacturing process as well as our products are inspected and certified regularly by TÜV. The products are certified by TÜV, SGS and STR (British Standard).

## Environment

Our products and components are tested regularly by accredited laboratories to ensure that no harmful substances are present, in accordance with EU directives.

# Care for your pram

Even though we perform quality and product life tests and only use material of the highest quality, it is still important for you to care for and maintain your pram in order for it to last and work effectively. No pram can remain free from wear and tear, for example, on the wheels and brakes and other moving parts on the chassis. Similarly, no fabric can maintain 100% light fastness if subjected to UV radiation. Follow the care instructions and you will have a lot of pleasure from your pram for a very long time to come!

## Care of fabrics

All fabrics are removable to enable them to be cleaned and the pram to retain its freshness. Follow the care advice supplied with the pram or contact your authorised retailer for care instructions. Fabric samples are available at all our authorised Emmaljunga retailers. Emmaljunga reserves the right against differences between fabric samples and the actual pram fabrics.

## If something happens to your pram

If you are not pleased with the quality of your pram for any reason, we kindly ask you to contact the retailer from whom the pram was purchased. Emmaljunga follows the statutory rules and regulations valid within the EU.

Material and manufacturing faults are faults that are considered to have existed on the product from the date of purchase (as printed on your receipt). Faults that occur within 6 months from the purchase date are considered to have been present from the time of purchase. Products which on inspection are found to have these faults will be repaired or replaced, if a repair is not deemed possible.

Faults that are found to be the result of an accident, airline damage, neglect, misuse, normal wear and tear or a result of not having correctly followed the care instructions are not valid complaints.

We recommend that you go to your dealer and have the servicing of your pram carried out according to the service manual. This will both extend the lifetime of your pram and also ensure that all of the important safety functions such as the brakes and attachments work correctly.

Summary	Award winning and the lightest in its class! With the addition of the lightweight, comfortable City Carrycot, you will get one of the market's best and lightest City 3-in-1's.	Super light city stroller with swivel wheels. Only 57cm wide and weighs only 11,3 kg with the City Carrycot. Ideal for urban travel in busy city streets and shopping centres.	An unbeatable lightweight stroller for those who travel a lot. Features the same light and simple chassis as the Nitro with swivel front wheels, but with an even lighter seat unit. The stroller weighs just 11 kg and 11,3 kg with the City Carrycot.	An Emmaljunga classic which has been a sales success worldwide for over a decade, with its extremely durable and stable chassis.	A little pram that can be extended into a sibling pram. With practical front swivel wheels. The pushchair only weighs 11 kg (with carrycot 11.4 kg).	Super light and comfortable, the City Carrycot is compatible with the City Cross, Nitro, Ozone and Classic Sport Stroller.
*Leatherette fabrics are slightly heavier

A market leading 3-in-1 with maximum comfort and space for your child. With its impressive range of features and functions, this pram is hard to beat! The Classic Chassis is comfortable and stable with reversible seat unit.	A market leading 3-in-1 with maximum comfort and space for your child. Its wide range of functions and features makes this pram hard to beat! The Sport Chassis is extremely strong and has a reversible handle.	A market leading 3-in-1 with maximum comfort and space for your child. Its wide range of functions and features makes this pram hard to beat! Duo S Chassis has front swivel wheels and weighs only 14,1 kg with a carrycot.	A great allround pushchair, which has become a true Emmaljunga classic. This year the stroller has been upgraded. The pushchair features a practical reversible handle and compact folding.	A great pushchair, suitable from 6 months onwards, ideal as a second pram. Compact folding. Great to push in snow and sand with it's compact wheels.	Practical stroller suitable from 6 months. Based on the design of the success-ful Scooter <sup>2.2</sup> with the addition of front swivel wheels for maximum manoeuvrability on busy city streets. Compact when folded.	A perfect little stroller to take in the car or on holiday. Weighs only 8.8 kg. Tried, tested, and simple. Perfect as a second stroller when your child is tired of walking and needs a rest.	A popular choice for parents with twins/small siblings, the Double City Cross, with its lightweight aluminium chassis, has been developed to provide maximum comfort on all types of terrain.

### Sibling Toddler Seat

With the Emmaljunga Toddler Seat you can take your older child along on short walks. The Toddler Seat can be assembled on to the seat unit on the following prams: Edge 3-in-1, Mondial 3-in-1, Smart 3-in-1, Classic Sport Stroller, Nitro and City Cross. Available in 2 colours: Navy and Black.

*Warning! You must carefully follow our safety instructions for the Toddler Seat.*

### Quadrolift

The Quadrolift has four practical functions and can be used from birth up to 3 years. It can be used as a Cocoon, a Lift, a Winter/Summer footmuff and a Winter/Summer seat pad. It fits in both the pram and stroller. For detailed information see page 54. Outer measurements: 83 x 38 x 21 cm. Inner measurements: 79 x 32 x 18 cm. Weight including seat pad: 3.1 kg. Weight without seat pad: 2.7 kg. Available in 28 colours.

### Babylift

Allows you to use your stroller for a newborn baby. It has a removable mini hood which protects your child against sun and wind, even when you have removed the lift from the pram. Includes mattress. Measurements: 75 x 30 x 19 cm. Weight 2.6 kg. Available in 14 colours.

### Sibling Toddler Roller

A practical transport solution for siblings. Easily attached on most Emmaljunga chassis. Easily clicked-on and off and if you don't need it during your journey, you can easily attach it to the handle (71300 and 72300 only). Emmaljunga offers the following toddler rollers:

Art nr. 74300: (incl. adaptor)

Fits Mondial/Edge 3-in-1 with Classic chassis, Smart 3-in-1 and Classic Sport Stroller.

Art nr. 71300 Alu Brake (incl. adaptor)

Fits Mondial/Edge 3-in-1 (with Sport Chassis, Duo S Chassis), Nitro, Ozone, City Cross, Cerex<sup>2.0</sup>, Double City Cross, Double Monkey

Art nr. 72300 Alu Brake (incl. adaptor)

Fits Scooter<sup>2.0</sup>, Scooter S, Monkey

Toddler Roller on City Cross chassis

Toddler Roller on Scooter<sup>2.0</sup>

## ACCESSORIES – Practical and colour coordinated

Buy the accessories with the pram! To make sure that you will get accessories to match your pram. You can find details of all accessories in all colours at:

[www.emmaljunga.co.uk](http://www.emmaljunga.co.uk)

### Travel System Adaptor

Allows you to attach the First Class<sup>0+Base</sup> car seat on to most of our prams \*. The adaptor has two recline positions - one is slightly more upright than the other which reclines a little to allow your child to sleep more comfortably. We also offer adaptors for other leading car seat manufacturers so you can attach these onto your Emmaljunga pram. For further information please visit our website: [www.emmaljunga.co.uk](http://www.emmaljunga.co.uk)

### Style Changing Bag

Under its glamorous exterior, the Style Changing Bag is a practical accessory featuring as many handy storage pockets as the Exclusive Changing Bag coupled with the storage capacity of the Sport version. With practical pockets for nappies, bottles, mobile phones and lots more. The interior of the bag is lined with a luxurious woven satin material and includes a changing mat in the same fabric. Available in Black. Measurement: 50x15x33 cm.

### Baby Footmuff

To provide perfect warmth and comfort for your baby in the carrycot, we have our new wonderfully soft Baby Footmuff. It can be used in the Mondial/ Edge/Smart carrycot and the City Carrycot/City Carrycot Supreme. The Baby Footmuff is not suitable for use in the pushchair seat unit. It is available in two colours: black fabric and White Leatherette.

### Footmuff

A comfortable and practical footmuff with lovely soft cotton fleece. The footmuff has openings for the 5-point harness with two separate positions for the shoulder straps. These two positions allow the 5-point harness' shoulder straps to be positioned a bit lower so that the smaller child can rest comfortably. Made using Thermofil, this item can be used all year around. In warm weather, the top panel can be removed to allow the footmuff to be used as a seat pad. There are also clips which allow you to attach the footmuff into the pram so that it will stay securely in place. Practical zip in centre. Available in 26 colours.

### Exclusive Changing Bag

The popular Exclusive Changing Bag is in essence a modern and spacious handbag with plenty of practical storage compartments for nappies, bottles, mobile phones and much more. Includes a separate changing mat. Available in Vanilla, Espresso and White Leatherette. Measurements: 48x11x34 cm.

### Allround Footmuff Leatherette

For our leatherette prams, there is now a matching exclusive footmuff with removable Inner-lining. As our leatherette fabrics cannot be washed (only wiped clean with a damp cloth), the soft inner-lining of the leatherette footmuff is removable so that it can be washed separately. It also features openings for the 5-point harness with two separate positions for the shoulder straps. These two positions allow the 5-point harness' shoulder straps to be positioned a bit lower so that the smaller child can rest comfortably. There are also clips which allow you to attach the footmuff into the pram so that it will stay securely in place. Available in Vanilla, Espresso and White Leatherette.

### Sport Changing Bag

More information on page 58. This new modern changing bag has a sporty look and is designed to provide maximum storage space with plenty of practical compartments for nappies, bottles and more. A washable changing mat is included. Available in 25 colours. Measurements 48x11x34 cm

### Minimizer/Seat Pad

To ensure that the 5-point harness is in a suitable position for a smaller child, you can buy a Minimizer/Seat Pad for your pram. It features two separate openings for the 5-point harness' shoulder straps so that you can position the straps lower down to ensure that the smaller child can rest comfortably. The seat pad is reversible with a hard wearing material. Available in 11 colours.

### Parasol

UV50+ protection. Practical for sunny days, the parasol can be easily attached to the chassis and can click on and off with ease. Available in 26 colours.

### Nylon Stormcover

A nylon stormcover in a practical bag is supplied with most of our prams. This can also be bought as an accessory.

### Exclusive Apron

This stylish tailored apron protects your child in the stroller in all weathers and provides extra protection in cold weather if used over the footmuff. Available in matching colours for: Nitro, City Cross, Ozone, Cerox, Scooter, Double City Cross. Available in 28 colours depending on pram model.

### Exclusive Mattress

If you want to make your child's pram even softer and cosier, you can buy our Exclusive Mattress as an accessory.

67300 Duo Combi  
68300 City Carrycot

### Clear Plastic Raincover

A clear plastic raincover with air vents. Protects both the child and the pram on rainy days. Features taped seams.

### Winter wheels

As an extra accessory, you can purchase winter wheels for Nitro and Ozone. They are slightly larger, fixed wheels the same width as the rear wheels, and which can be fitted to the pram instead of the swivel wheels. The package includes two wheels, one axle and two brackets. Assembly takes place in store.

### Exclusive Nylon Stormcover

Exclusive stormcover with taped seams.

### Chrome chassis with leatherette handle

If you want a truly exclusive pram, we also offer a chrome chassis with leatherette handle that comes pre-fitted from the Emmaljunga factory. Item no. 17399

### Bedset Box

Everything you need to make your child's pram even more comfortable: Soft duvet (80x80 cm) Soft pillow (35x40 cm) Pillow case (35x40 cm) Duvet cover with embroidery (80x80 cm) Sheet (105x60 cm)
