

A person wearing a bright orange, hooded rain suit is standing on the deck of a boat. The suit has dark, textured straps across the chest and a dark belt. The person is holding a black cable or rope in their right hand. The background shows a choppy blue sea and a sky filled with many seagulls in flight. The overall scene suggests a maritime or fishing environment.

GRUNDENS®

PROFESSIONAL RAINWEAR

RAINWEAR WITH AUTHENTIC RUGGED QUALITY

Our story begins in Grundsund, Sweden where Carl A. Grundén, the son of a North Sea fisherman, started producing oiled garments commonly known as oilskins. The people of this Swedish West Coast village were focused and driven to produce raingear made with the best quality and durability to protect professional fishermen working the stormy waters of the North Sea.

Today, more than one hundred years later, Grundéns is still growing and producing the very best raingear for professional fisherman. Our organization has grown, with larger factories and warehouses in more countries, but the focus and drive and ambition to develop and produce top quality rainwear remains unchanged. More and more people in all outdoor occupations and outdoor pursuits now enjoy the quality, function and joy that comes from wearing a true Grundéns Quality garment.

A handwritten signature in black ink, appearing to read 'MJ', with a long horizontal flourish extending to the right.

MICHAEL JACKSON, CEO GRUNDÉNS USA

A close-up photograph of an older man with white hair, wearing a dark blue jacket over an orange waterproof suit. He is focused on his work, handling a thick blue rope and a green fishing net. The background is a blurred view of a body of water and distant land.

THE HISTORY OF GRUNDÉNS RAINWEAR

1911

The son of a fisherman, Carl A. Grundén founded a factory for oiled garments in Grundsund, Sweden. The production seized in 1914 because of material shortage linked to the onset of World War I.

1926

Carl A. Grundén once again started to produce oiled garments in Grundsund. The company was named Grundéns Regnkläderfabrik AB ("Grundéns Rainwear Factory Inc.") and has ever since developed and manufactured rainwear.

1930

During the 1930s, Grundéns introduced rubberized fabric as material for rainwear. Rubberized fabric was a lot more comfortable and durable than oiled cloth.

1950

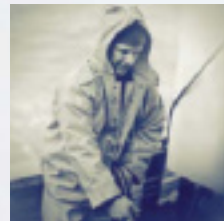

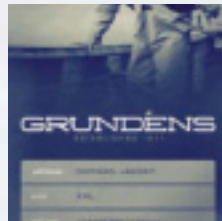

In the beginning of the 1950s, Grundéns began using PVC-coated fabrics. This material is still the world-leading fabric for professional rainwear that demands outstanding durability.

1954

1954 Grundéns introduced the Herkules bib pant to the commercial fishermen on the West coast of Sweden. Herkules quickly became the standard most fishermen preferred. That is still true today. No other item for the professional fisherman is as proven or has stood the test of time like Herkules.

1955

The company reached its peak of expansion in Grundsund. During the summer of 1955 the factory was moved to Uddevalla, Sweden.

1972

Grundéns decided to start up production in Portugal. A factory was established and the company invested in a modern production facility with competent personnel. The headquarters and parts of the production remained in Sweden.

1977

Grundéns sponsored the racing boats Sverige, Independence, Enterprise and Courageous in their America's Cup endeavor. All crew members wore Grundéns rainwear.

1991

Brothers Mike and Dave Jackson, both commercial fishermen, acquire the distribution rights for North America and Grundéns USA is launched.

1994

Grundéns South America was established in Santiago, Chile.

2012

Grundéns moves its world headquarters to Borås, Sweden and launches a new website, product catalogue and graphic identity.

2013

Grundéns relocates its production factory to a larger facility in the same region of Portugal and increases production to keep up with growing demand.

THE RAINWEAR SPECIALIST

Ever since Carl A. Grundén made his first pair of oilskins on the Swedish West Coast over a century ago, Grundéns has been dedicated to producing professional rainwear for rugged outdoor individuals who harvest the oceans for food, build shelters for families and construct the factories, roads, bridges, and airports on which the world's industries depend. Each and every one is an athlete in his own way, striving for the simple, yet satisfying reward of a job well done.

HDX - THE MATERIAL WITH RAW DURABILITY

HDX is the name of our garments made from PVC-coated fabrics (Polyvinylchloride). The HDX garments have a long life span and are extremely durable for tough conditions.

- HDX01** *PVC-coated polyester fleece. Total weight: 370 g/m².*
 - Low-temperature resistant.
- HDX02** *PVC-coated polyester. Total weight: 325 g/m².*
 - Oil resistant. • Fish oil resistant. • Flameproof, EN 14116
- HDX03** *PVC-coated polyester. Total weight: 325 g/m².*
 - Fluorescent. • Flameproof, EN 14116
- HDX04** *PVC-coated polyester. Total weight: 330 g/m².*
 - Supple.
- HDX05** *PVC-coated polyester. Total weight: 330 g/m².*
- HDX06** *PVC-coated cotton. Total weight: 400 g/m².*
 - Low-temperature resistant.
- HDX07** *PVC-coated cotton. Total weight: 435 g/m².*
 - Low-temperature resistant.
- HDX08** *PVC-coated cotton. Total weight: 460 g/m².*
 - Fluorescent.
- HDX09** *PVC double-coated polyester. Total weight: 460 g/m².*
 - Extremely tear resistant. • Low-temperature resistant.
- HDX10** *PVC-coated cotton. Total weight: 540 g/m².*
 - Oil resistant. • Low-temperature resistant.
- HDX11** *PVC-coated cotton. Total weight: 540 g/m².*
 - Low-temperature resistant. • Very resistant to abrasion.
- HDX12** *PVC-coated cotton. Total weight: 610 g/m².*
 - Low-temperature resistant. • Very resistant to abrasion.

LDU - THE MATERIAL WITH FLEXIBILITY

LDU is the name of our garments made from PU fabrics (Polyurethane). The LDU garments feature some elasticity. They are lighter than the HDX garments, but still possess great tear resistance.

- LDU01** *PU-coated Polyamide jersey. Total weight: 170 g/m².*
- LDU02** *100% PU with polyester backing. Total weight: 230 g/m².*

SYMBOL DESCRIPTION

Each product comes with symbols that explain its characteristics.

WEIGHT:
330 G/M²

Weight shows the weight of the material per/m².

The bar indicates the strength of the material.

HDX01

Shows what material the product is made of.

EN 343 Protection against rain.

The standard specifies test methods and requirements for fabrics and seams in garments intended to protect against bad weather. The garments are being tested for waterproofness and impermeability to water vapor.

ANSI/ISEA 107-2010 Protective, high-visibility clothing.

The standard specifies requirements for clothing intended to make the user visible in hazardous situations, regardless of lighting conditions.

EN ISO 14116 Protection against heat and flame.

The standard specifies the requirement for properties in terms of flame spread of materials and material combinations used in protective clothing.

EN 388 Physical and mechanical stress on gloves.

The standard specifies characteristics such as protection against abrasion, cutting, tearing and perforation.

EN 374 Protection against microorganisms.

The standard specifies the gloves' ability to protect the user against microorganisms.

Oil resistant.

The material is resistant to oil.

Low-temperature resistant.

The product is resistant to low temperatures and maintains its flexibility.

THE ORIGINAL

Brigg and Herkules is the product family that has defined the standards for the commercial fisherman on deck in some of the harshest weather conditions on the planet. First introduced in 1954, no other piece of gear for the commercial fisherman has withstood the test of time like Brigg and Herkules from Grundéns.

NYHET!

Här nedan återger vi avtryck å annons införd i tidningarna Bohuskusten, Svenska Väst kustfiskaren och Ostkusten dec. 1954, jan. och febr. 1955 rörande våra nya regnkläder **HERKULES**.

Då behövs det rejäla don

FISKARE!

Detta är någonting som intresserar just Er

Ni har ett surt och krävande arbete som fordrar rejäla gummi- eller vävplastkläder, som ger fullgott skydd och som tål stora påfrestningar. Vi har daglig kontakt med yrkesfiskare och har hållit på med vår tillverkning av fiskarekläder sedan år 1926. Vi känna därför vårt ansvar och släpper ej ut nya material förrän de grundligt hunnit utprovas av fiskare ombord. Ni kan därför lita på, att de regnkläder Ni köper stämplade med vårt över hela landet kända varumärke ger full valuta för pengarna.

Nedan återger fiskaren Elof Simonsson sin syn på våra nya kläder **HERKULES**, som även vi anse vara de bästa som vi någonsin tillverkat:

HERKULES RELEASE, GRUNDSUND, SWEDEN 1954 (TRANSLATED FROM SWEDISH)

Attention, fishermen!

Here is something that will interest you.

You have a hard, demanding job, one that requires fully waterproof rubber clothes that provide protection from nature's harshest elements. We have daily contact with commercial fishermen and Grundéns has produced clothing for commercial fishermen since 1926. Because of this, we feel responsible to delay introducing new products until they have been tested by commercial fishermen. So, when you see the Grundéns logo on a garment, you can trust that you are getting a quality product.

Here is a personal account from fisherman Elof Simonsson, describing his experiences with Grundéns Herkules bib pants. His words reconfirm for us that this is the best product made to date for commercial fishermen:

February 5th, 1954

I was asked by Grundéns to test a pair of Herkules bib pants. Since then, I have only worn this pair of pants, and have used them daily on the F/V Patricia while fishing for cod and sole in the North Sea. When I picked up the pants, I was told to use them as hard as I could in the harshest commercial fishing conditions and situations. Since these were my instructions, I have not spared them from anything. The pants are lightweight, soft, and can withstand diesel fuel and frigid temperatures. They do not slide up my leg, nor have they leaked at any of the seams.

After 10 months of hard wear and tear, these pants are still intact with no damage. They are the best bib pants I have ever used, so I am happy to provide Grundéns Herkules with this review.

Elof Simonsson

BRIGG JACKET

HERKULES BIB PANT

BRIGG ANORAK 34

Anorak with adjustable hood. Neoprene cuffs at sleeve ends. Relaxed fit.

WEIGHT: 540 G/M²  HDX11 SIZE: XS-3XL

PRODUCT CHARACTERISTICS:

TROMS BARVELL 198

A traditional Scandinavian fishing garment, the Barvell is a tube-shaped apron that has no front or back. It is popular in summer months and warm climates because it offers maximum air flow. Unlike other aprons, it will not blow about in a strong wind. It hangs off the shoulders like bib pants instead of the neck like a normal apron. Think of it as a fishing kilt. It is also popular for food processing.
