

CONTROL PANEL

Aria "Red" and "Elite" are equipped with a manual electronic control. The functions include: soft start, power and motor temperature control. A series of easy to read color coded lights indicate the selected power level.

Aria "Platinum" is equipped with a sophisticated electronic control allowing it to automatically regulate the correct power for major uses. With a simple touch of a button you can increase or decrease the power to suit your individual needs. All the Aria models are equipped with full bag indicator.

TRANSPORTS EASILY

The two ergonomic upper and lower handles and the perfect weight distribution make transporting the Aria effortless in the horizontal or vertical position. The tapered profile, allows the machine to easily fit on a stair step.

Aria

Aria

Aria vacuum cleaner is the result of years of careful planning on both the creative and functional level. We have created a machine that offers a sleek design that provides the highest quality performance and filtration along with exceptional versatility and whisper quiet sound levels.

The highly efficient vacuum motor, engineered and built by sister company Rotafil, well exceeds the once thought impossible 1,000 hour mark. An amazing number when you consider the average vacuum cleaner is used less than 50 hours per year. The sophisticated electronic control gradually turns on the machine providing the ability to regulate the vacuum power while monitoring the motor temperature.

The full size deluxe on-board tools include an upholstery tool with removable bristles, full length crevice tool and round swivel dusting brush with natural bristles. The 3 liter Micropor Hepa style bag in addition to other stages of filtration brings the Aria to a total of 5 levels of filtration which assures excellent protection against dust mites, pollens etc. For people with serious allergies, Aria can be equipped with the Lindhaus S-Class Hepa filter (optional) which assures 99.97% of filtration efficiency at 0.3 micron. The Aria returns this purified air into the room through an exclusive draft free clean air ventilation system built into the 360 degree bumper. This design eliminates harmful unfiltered vacuum cleaner exhaust. Aria Platinum includes the carbon active/micro filter mounted before the motor, (available as an option on other models).

CARPET CLEANER

The power head and dry-cleaning functions are standard on the Elite and Platinum series, optional on the Red. The electrified hose with controls for both vacuum and brush motors, has a quick release cordless connection for attaching the power nozzle, wand, and accessory tools. The sturdy stainless steel telescopic wand provides convenient height adjustments for easy vacuuming.

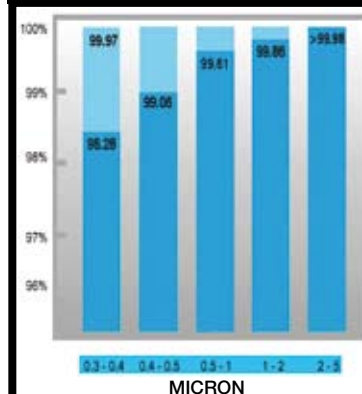

Comparative dimensions of the most common household contaminants, dangerous for our health.

Test with Microfilter and Carbon Activ filter
Test with Hepa Filter

The efficiency filtration test shows the results of its precise construction technology.

NET EFFICIENCY FILTRATION

S-CLASS HEPA FILTER

TURBO POWER NOZZLE

Thanks to the powerful vacuum, Aria can be equipped with an optional multipurpose turbo nozzle for carpets and upholstery.

EXCELLENT MANEUVERABILITY

The sleek design and front mounted hose, along with three swivel rubber wheels provides greater control and easy maneuverability. The Aria is equipped with a soft non-marring 360 degree bumper for protection of walls and furnishings.

BLOWER PORT

Aria offers a blowing function to remove dust in hard to reach areas. With an additional hose (optional) the Aria can use the suction and blowing function simultaneously. Aria's powerful 1200 watt motor can inflate air beds, clean heat/air conditioning vents, and get behind hard to reach appliances etc.

DRY CLEANING SYSTEM

The multipurpose power nozzle transforms to a dry cleaning system that cleans and sanitizes carpets and upholstery. Use the Lindhaus Pure Power micro-sponges, made from soft natural fibers damp to the touch with organic cleaning essentials. The powerful brush works these sponges throughout the carpet, absorbing the grime as they wash the fibers. The soiled micro-sponges are simply swept away with your Aria in the vacuum mode. The Dry Cleaning feature is extremely easy to use, yet provides deep thorough results that ensure a clean healthy home.

UNIVERSAL BRUSH

The award winning design of this patented low profile nozzle works on hard floors and safely cleans expensive hand woven rugs and carpets. The dual swivel neck and 4 rubber wheels assures precision cleaning in and around hard to navigate furnishings.

NOZZLE WITH FELT

The available felt floor nozzle polishes and vacuums delicate floors such as marble, wood, and laminates. The felt pad may be removed exposing the bristles which are excellent for use on cement or rough tile floorings.

ON-BOARD ACCESSORIES

The full sized deluxe on-board accessories include a multi-purpose upholstery/stair tool, full length crevice tool and natural bristle swivel dusting brush. Further accessories such as the optional turbo brush are also available.
