BALTIC SEA LED FLASHLIGHT

BALTIC SEA: This is a new design for 2006 that incorporates the latest in battery management electronics and a high performance 3 watt LED. The advanced electronics can more than double the battery life at equal or greater light output than some other similar size competitive LED flashlights.

The BALTIC SEA is small, compact and versatile. It may be configured by the user to different requirements. The head is available in 5 different power levels, from extended run time to unrivaled light output. And there are up to 9 different battery compartment styles in 5 different case metals.

The BALTIC SEA can use Alkaline, Lithium, or NiMH rechargeable batteries in AAA, 2xAAA, N, or 2x LR-44 sizes.

Options include a momentary switch in place of the negative battery contact, (see diagram), a translucent cover to reduce light output when required, and battery compartment caps for carrying spare batteries.

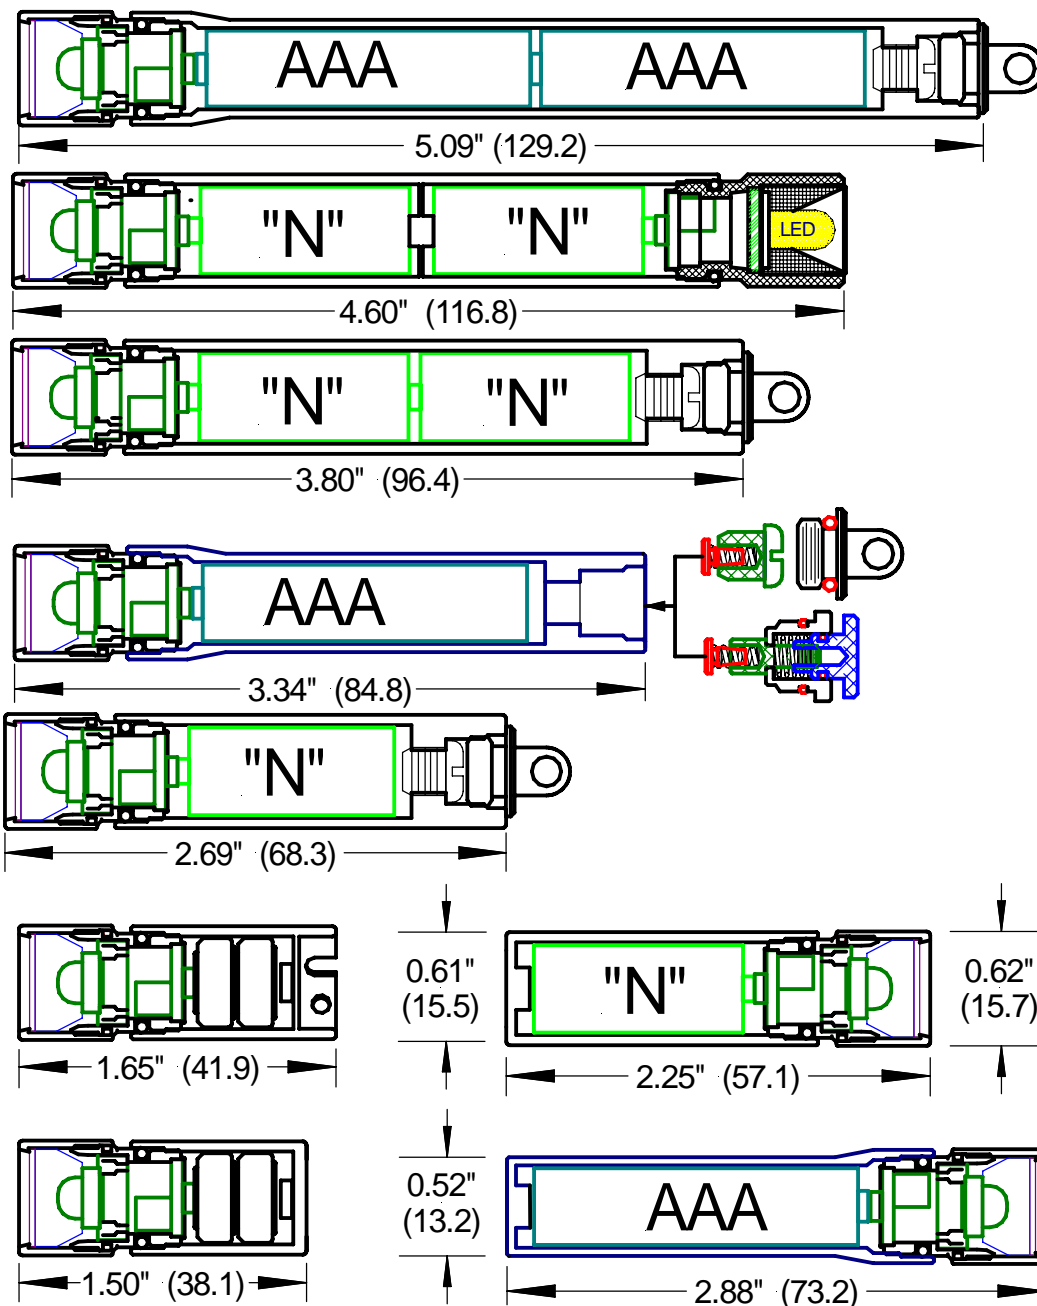

Designed and manufactured in the USA.

- Machined from Aluminum, solid Brass, Stainless-Steel, limited runs of Titanium or Gold plated Brass.
- Epoxy sealed head
- Water and Shock resistant
- 5 different power output levels
- 50 to 500 candlepower
- 9 different battery compartments
- Reliable momentary tail switch
- 3 different battery sizes
- 3 different battery types
- Custom laser engraving
- Sized for Every Day Carry
- Unequaled light output
- Best battery run time
- Unbreakable lens
- True natural white light output
- 3 watt high flux LED
- Highest efficiency electronics
- Used by Professionals

No other LED flashlights equal the quality, performance, versatility, or overall lasting value offered by Peak LED Solutions.
