## PACIFIC LED FLASHLIGHT

**PACIFIC:** This is a new design for 2006 that incorporates the latest in battery management electronics and a high performance 3 watt LED. The advanced electronics can more than double the battery life at equal or greater light output than some other similar size competitive LED flashlights.

The PACIFIC is small, compact and versatile. It may be configured by the user to different requirements. The head is available in 5 different output levels, from extended run time, (over 70 hours), to unsurpassed output power. And there are up to 5 different battery compartment styles in 5 different case metals.

The PACIFIC can use Alkaline, Lithium, or NiMH rechargeable batteries in AA, AAA, 2xAAA, or 3 volt CR-2 sizes.

Options include a momentary switch in place of the negative battery contact, (see diagram), a translucent cover to reduce light output when required, and battery compartment caps for carrying spare batteries.

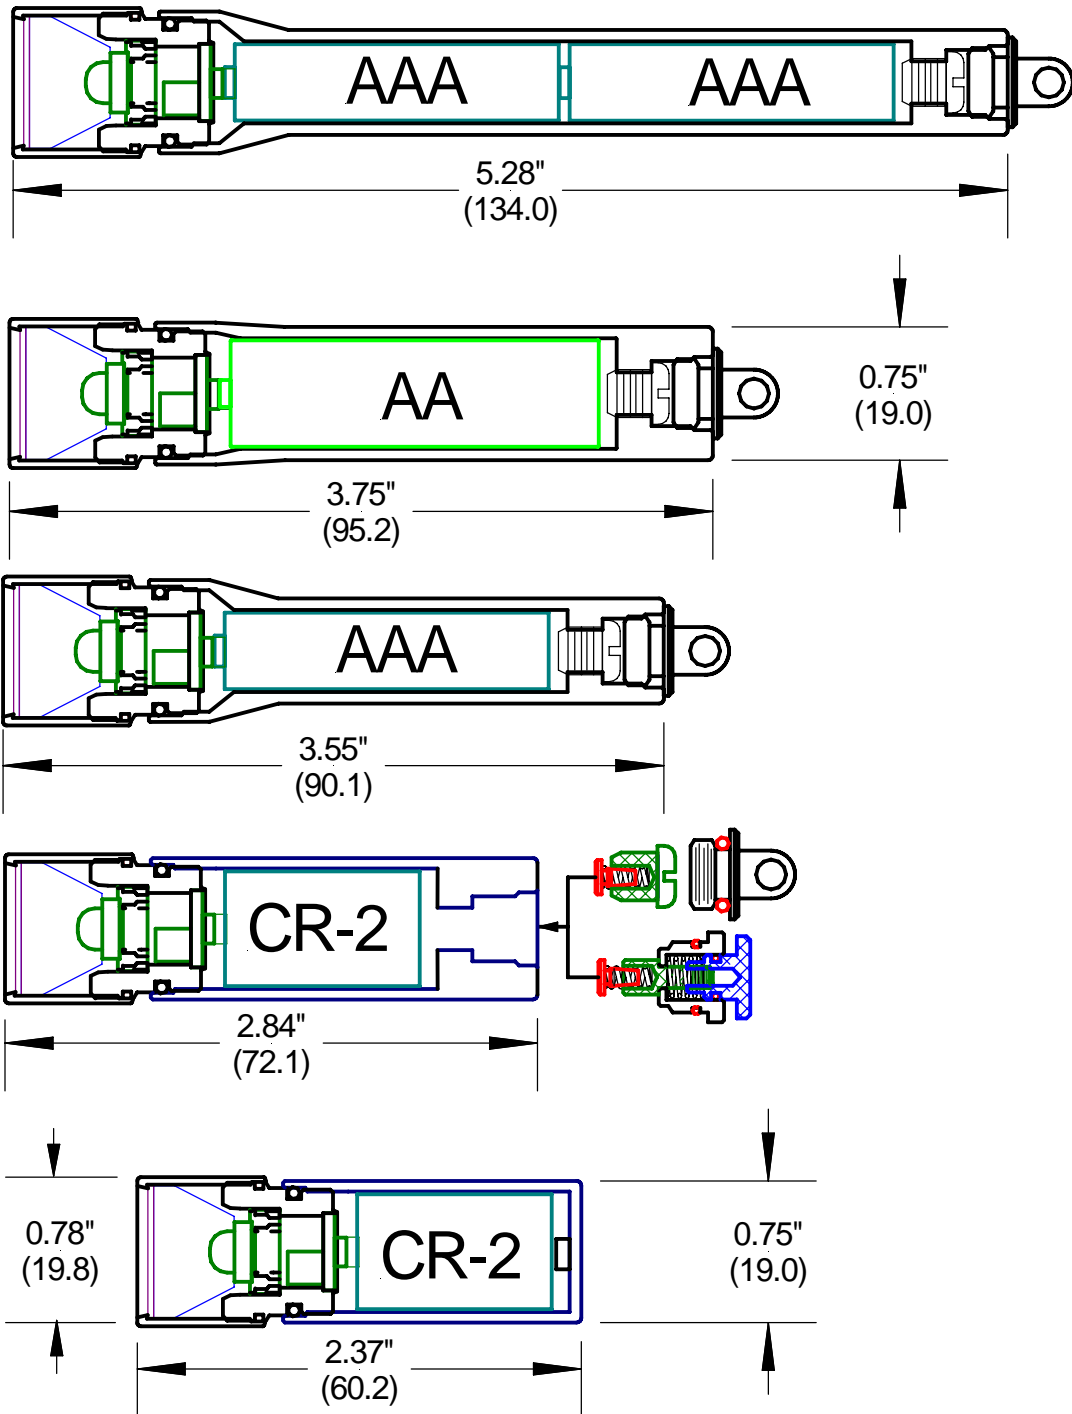

Designed and manufactured in the USA.

- Machined from Aluminum, solid Brass, Stainless-Steel, limited runs of Titanium and Gold plated Brass.
- Epoxy sealed head
- Water and Shock resistant
- 5 different power output levels
- 50 to 1000 candlepower
- 5 different battery compartments
- Reliable momentary tail switch
- 3 different battery sizes
- 3 different battery types
- Custom laser engraving
- Sized for Every Day Carry
- Unequaled light output
- Best battery run time
- Unbreakable lens
- True natural white light output
- 3 watt high flux LED
- Highest efficiency electronics
- Used by Professionals

No other LED flashlights equal the quality, performance, versatility, or overall value offered by Peak LED Solutions.
