

PEAK LED SOLUTIONS

SHASTA LED FLASHLIGHT

SHASTA: This high performance LED flashlight uses the latest in battery management electronics with 1 or 3 high output 5 mm LEDs. With our premium electronics we can more than double the light output of some other similar size competitive N cell battery 5 mm LED flashlights and with greater battery life.

The SHASTA is an ideal EDC small pocket or key ring LED flashlight. The head is available in 5 different power levels using our exclusive 'SNOW' white LEDs. There are up to 4 different battery compartment styles including a double headed style and 3 different case metals.

The SHASTA can use Alkaline, Lithium, or NiMH rechargeable batteries in N cell or 2 x N sizes.

Options include a momentary switch in place of the negative battery contact, (see diagram), a translucent cover to reduce light output when required, and battery compartment caps for carrying spare batteries.

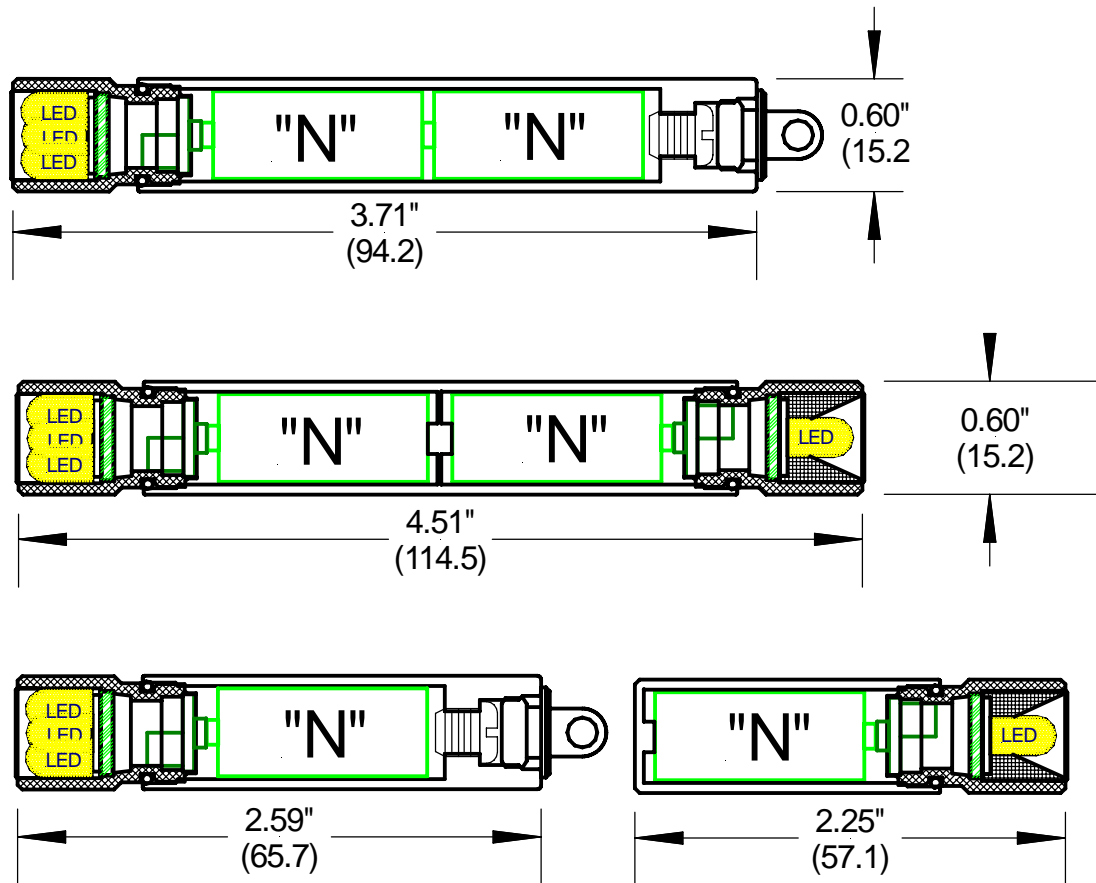

Designed and manufactured in the USA

- Machined from Aluminum, solid Brass, or limited runs of Gold plated Brass.
- Epoxy sealed head
